Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_ApStatR	Course name: Applied Statistics in R System
Type, extent and method of instruction: Form of instruction: Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1.	
Level: II.	
Prerequisites:	
Course completion conditions: a) Regular term: Practical exam - 100 points The student will receive a maximum of 100 points for the practical exam in the form of the assigned analysis in due time to complete the course. With the practical exam, the student demonstrates the acquisition of knowledge provided in the course. To successfully pass the course in due time, the student needs to obtain at least 65 points of the overall evaluation. b) Correction term: A student who does not meet the conditions for successful completion of the course in due time, in the corrective term for the completion of study obligations will pass a corrective practical exam, for which he can obtain a maximum of 100 points of the overall evaluation. To successfully complete the course in the correction period, the student needs to obtain at least 65 points of the overall evaluation. During the practical exam in the regular or corrective term, the student is allowed to use any available study materials, or work with information from the Internet.	
Learning objectives: -knowledge: The student will be acquainted with the basics of the statistical system R, with the basics of the syntax of the R language and basic pre-programmed commands. He will be able to process data, visualize them and learn about the possibilities of finding patterns and contexts in the data. Student will learn the theoretical and practical background of supervised and unsupervised models. -skills: The student is able to apply the acquired knowledge in solving specific practical tasks focused on economic practice. Can visualize and graphically present data. Can assess the suitability of selected tools, interpret the results and evaluate the accuracy of statistical procedures. -competence: The student will be able to edit and process data in the statistical system R, will be able to create mathematical-statistical models in this system, will be able to interpret, analyze and present the results.	
Brief outline of the course: Introduction to R. Basics of programming in R. Data sources and their graphic presentation. Basic statistical procedures in R (probability distributions, regressions, linear models, time series, prediction models and models without a teacher). Application of the R program in measuring credit risk.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_OR-aj	Course name: Business Negotiations (in English)
Type, extent and method of instruction: Form of instruction: Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1., 3.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: seminar paper: 15 points presentation on the topic of business negotiation: 15 points b) final assessment: preparation and presentation of a simulated business negotiation: 30 points test: 40 points	
Learning objectives: After the completion of the course, the student can: <ol style="list-style-type: none"> 1. use acquired knowledge and skills in negotiation, 2. draw up the agenda for a negotiation, 3. conduct a discussion, listen actively and ask effective questions, 4. present arguments for persuading the other party, 5. solve conflicts and handle breakdowns, 6. make and respond to proposals, 7. use different negotiating styles, strategies and tactics, 8. summarize the results of negotiation. 	
Brief outline of the course: Definition of negotiation. Intercultural aspects of negotiation. Strategies, tactics and styles in business negotiation. The principal stages of a formal negotiation. Relationship-building. Putting together a team for an international negotiation. Starting the negotiation – small talk. Setting objectives, drawing up the agenda, timing, procedure, establishing positions and exploring interests. Making and responding to proposals. Body language. Bargaining – exerting pressure, making concessions and attaching conditions. Persuasive tactics and responding to pressure tactics. Non-ethical negotiating tactics. Options for dealing with problems and conflicts. Conclusion and follow-up actions. The individual stages of negotiation are practised in the form of role-plays and the final output is a team presentation of a complex simulated business negotiation.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_P SzMVS-aj	Course name: Case Studies from Public Sector Management
Type, extent and method of instruction: Form of instruction: Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1., 3.	
Level: II.	
Prerequisites:	
Course completion conditions: Final assessment: a) Active participation during case-studies' presentations (50 points) b) semester project (case study) and its defence (50 points)	
Learning objectives: student can 1. critically analyse the current trends in public sector management, 2. provide arguments on basis of the acquired knowledge in a discussion with a professional, 3. create case study using methodological concepts and compare the findings with current knowledge published in research papers.	
Brief outline of the course: - this course is based on presenting case studies from current practice and presentations provided by professionals/experts from practice, who are in leading/managerial positions in public sector organizations on various levels (local, regional, national), - case studies are provided a few weeks before the presentation with supporting literature and students are required to study the materials, dig into the problematics and prepare relevant questions for the presenters (strengthening the competence to understand the topics and place relevant questions) - one week before the seminar led by an expert, the teacher introduces the given topic/problem - at the seminar led by an expert, the students actively participate in discussion about the problems of practical application of their knowledge based on analysed case study and prepared questions. Key topics covered: 1. Public sector performance management – concepts and design 2. Strategic performance management of central government – legal and managerial consequences 3. Public governance and smart governance. 4. Local governance participation. 5. Alternative service delivery arrangements Contracting out in public sector. Contract management in public sector. 6. Behavioural economics in public sector. 7. Alternative funding of public services. Co-creation. Co-production. Crowdfunding.	

8. Participatory budgeting.
9. Implementation of digital tools in governance.
10. Potential of ecosystem services and its importance for local and regional stakeholders.
11. Place marketing. Place branding. Place marketing strategies.

Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: preparation and presentation of project: 40 points b) final assessment: Written exam: 60 points	
Learning objectives: After completion of the course, the student can: 1. rationally solve problems associated with the movement of material in small and medium-sized enterprises, 2. to create, assess, evaluate and manage the logistics system for small and medium-sized enterprises through the use of knowledge acquired starting from procurement through production component to the distribution of goods to customers, 3. to obtain, evaluate and use information for a logistics strategy, logistics information system and security subsystems to ensure the improvement of logistical processes in SMEs.	
Brief outline of the course: <ol style="list-style-type: none"> 1. Introduction to Logistics. 2. Basic characteristics and organization of logistics. 3. Purchasing, production, and distribution logistics. 4. Customer Service. 5. Tasks and objectives, components and tools of supplying logistics. 6. Selection of suppliers. 7. Receipt of goods. 8. Warehouse logistics, warehouse logistics trends. 9. Production planning and management, philosophy JUST IN TIME. 10. Distribution, order processing, packaging. 11. Sustainable versus green logistics. 12. Logistics information system. 13. Logistics strategy, logistics decisions, success factors of logistics.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_KKvRR	Course name: Creativity and Culture in Regional Development
Type, extent and method of instruction: Form of instruction: Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1., 3.	
Level: II.	
Prerequisites:	
Course completion conditions: The maximum number of points obtained for the interim and final evaluation is 100. It corresponds to the classification scale of the evaluation. Credits will be awarded to a student who has obtained following the requirements at least 65 of 100 points. a) continuous assessment: elaboration of the assignment and research during the semester: 0-50 points b) final assessment: seminar work and its presentation using activating forms of teaching: 0-50 points	
Learning objectives: Student after successful completion of the course: <ol style="list-style-type: none"> 1. understands and actively uses terminology and knowledge of culture and creative industries 2. applies theoretical knowledge in solving specific problems of the development of culture and cultural institutions in the territory 3. assesses the issue in its current context and in the context of trends connected with the development of society 4. identifies problems in the development of culture and creativity in the territory and suggests solutions based on current trends 5. will create a separate professional-research seminar work 	
Brief outline of the course: Definition of basic terms. Culture, creativity and economy. Creative economy. The role of culture in the national economy. Culture and creativity in regional development. Funding of culture. Management of Culture. Culture development planning. Marketing of Culture and territory branding. Culture and creativity in the context of sustainable, intelligent and resilient development of cities and regions. UNESCO – culture and creativity in regional and local development. Case studies – creativity in local and regional development. Case studies - culture in local and regional development.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_KaB	Course name: Digital Currencies and Blockchain
Type, extent and method of instruction: Form of instruction: Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1., 3.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: in-class active participation and presentation of news: 50 points b) final assessment: written test 50 points	
Learning objectives: <ol style="list-style-type: none"> 1. Be able to describe the Byzantine Generals' Problem (a classical problem on how to achieve a single winning strategy involving various parties, some of which may be corrupted, untrusted, or may disseminate inaccurate information) and how do blockchains address this problem. 2. Understand the basics of blockchain technology, i.e. cryptographic functions (hashes), the process of mining and issuance of new currency, various consensus mechanisms including the 'Proof-of-Work' consensus mechanism used in the Bitcoin Blockchain. 3. Distinguish among various types and properties of centralized, decentralized and hybrid blockchains and ascertain which of them is suitable for what purposes. 4. Understand how blockchain technology creates trust among untrusted parties and immutable entries, by linking/chaining blocks of information together (thus the concept of 'blockchain'). 5. Distinguish the basic characteristics and key metrics of Bitcoin and altcoins (alternative cryptocurrencies issued after Bitcoin) such as Ethereum, Tether, BNB, USD Coin, XRP, Cardano etc. 6. Learn how to transact and store cryptocurrencies, look-up and dissect real transactions in open blockchain networks. 7. Dive-in to more technical aspects of the technology such as mining pools, segregated witness, lightning network, forks and smart contracts, their uses and challenges. 8. Learn why this is an innovative technology and understand its potential to disrupt a number of other industries. 9. Identify some of the industries that may be disrupted by this technology, such as financial institutions, health, real estate, supply chain, academia, and others, as well as describe blockchain-related use cases. 10. Understand more advanced uses of the blockchain such as escrow services, asset registration, attestation, smart contracts, digital assets, tokenization, CBDCs, DeFi and others. 	

11. Understand what parallels and differences cryptocurrencies have with the existing monetary and banking systems.
12. Evaluate how central banks or governments may issue their own digital currency, for what purposes and to what end.
13. Identify some of the legal, regulatory and taxation challenges that this new technology may bring and learn how do major global regulators look at these issues.
14. Understand major frameworks for regulating cryptocurrencies.
15. Explore the current mega-trends towards decentralization and how blockchain and other technologies, such as AI and the IoT, fuel these trends.

Brief outline of the course:

The course provides an introductory understanding of blockchain technology and decentralized digital currencies (cryptocurrencies), such as bitcoin. The course will:

- survey the theory and principles by which digital currencies operate;
- provide practical examples of basic transactions and operations of blockchain or distributed ledger-based systems;
- explore the current and future interaction of digital currencies with banking, financial, legal and regulatory systems;
- help students understand the disruptive potential of blockchain and how this ecosystem can be perceived as an innovation;
- discuss the newest developments in the space (for example, tokenization, DeFi and CBDCs), explore the synergies between blockchain and other disruptive technologies (such as artificial intelligence and the internet of things) and provide a vision and thesis for a decentralized future.

The course will consist of four general topics:

1. Theoretical introduction to digital currencies: This will include the history of digital currencies, the invention of decentralized consensus through proof-of-work, and a technical overview of cryptocurrencies such as bitcoin, as well as alternative/advanced uses of the blockchain.
2. Practical introduction to digital currencies: This will include practical, introductory exercises in utilizing and constructing digital currency transactions.
3. Banking, financial and regulatory implications: Overview of how blockchain technology could revolutionize the existing monetary and banking system and possible approaches to regulation and development.
4. Innovation & development: How cryptocurrencies and blockchain technology can be viewed through innovation frameworks and what possibilities exist for further developments, including new blockchain uses (tokenization, decentralized finance [DeFi], central bank digital currencies [CBDCs], etc.) and convergence of blockchain with other technologies (most notably artificial intelligence and the internet of things) toward a decentralized future.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_DigMar	Course name: Digital Marketing
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 3.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: active participation work on solving practical tasks during semester (0-60 points) b) final assessment: Number of points achieved for continuous and final evaluation is 100. It refers to a rating classification scale. Credits are assigned to students that obtained at least 65 points out of 100 for fulfillment of all duties within the course. Final test: 0-40 points Within resit examination, student repeats that part(s) of the assessment in which he/she gained lowest number of points, to achieve the final sum of at least 65 points.	
Learning objectives: Student: Knows basic terms and understands principles of online and digital marketing Adopts skills for identification, examination and addressing the target market Is able to create digital marketing strategy and digital marketing plan Masters utilisation of modern tools of digital marketing in practice to achieve online objectives Acquires the ability to use analytical tools, measure online performance and based on this to formulate managerial recommendations Adopts and develops his/her digital, cross-sectional and soft skills and competencies in the field of communication, teamwork and critical and creative thinking	
Brief outline of the course: Definition of basic terms related to digital and online marketing. Online vs offline behaviour of customers, methods of their identification and examination, their similarities and differences (STDC, AIDA model, customer segmentation, contact/touchpoints). Work with data and statistics in the field of digital technologies. Creation of digital plan and development of online strategy : scope, technologies, creative content, mission, objectives and KPI, USP and differentiation, analysis of competition search engines and Google Alerts), budget, feedback. Digital presentation on the internet: internet local listings, web pages, mobile applications, social media, electronic business. Search engine optimisations (SEO), search engine marketing (SEM). Key words and bid action system, PPC campaigns (pay-per-click advertising).	

Building relationships with customers and raising awareness about the company on social networks.
Development of mobile devices, mobile web and mobile applications.
Content marketing, and content advertising, e-mail marketing, place of video in marketing.
Analytical tools for measurement of online performance and success, web analytics and effective data presentation. Ethical considerations in data utilisation, GDPR.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_DS	Course name: Diploma Seminar
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 3.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: Writing 20 literature sources reviews to the diploma thesis: 50 points b) final assessment: Writing a part of the diploma thesis – methodology (objective, methods of collection and treatment of the DT), outline of the DT, submission of 10 pages of the 1st chapter): 50 points	
Learning objectives: The student can: <ol style="list-style-type: none"> 1. use the theoretical knowledge from the study in the treatment of the diploma thesis topic 2. write a diploma thesis as a project 3. apply a logical structure, the theoretical knowledge from the study to the solution of a particular problem from practice 4. assess the state-of-the-art of the examined issue in a company or in the respective part of the market 5. evaluate the results of research and collected data analysis 6. suggest recommendations or new solutions in the respective area. 	
Brief outline of the course: <ol style="list-style-type: none"> 1. Diploma thesis as a project, its position in legislation. 2. The Faculty expectations from diploma theses, problems with solving a DT. 3. Content and form of DP. 4. Project of DT, work plan, preparation of writing a DT. 5. Study – literature and other resources review, preparation of a literature review, the purpose of a literature review, preparation of bibliographic references. 6. Resources and secondary and primary data collection, methods of data collection and processing. 7. Formulating the object of research, defining a working hypothesis, setting the objective. 8. Structure of DT, writing an outline of DT. 9. Methods of research. Processing of the collected material to the final version of DT. 10. Types of argument and work with them. 11. Work with the text of DT, models of composition of the main text. 12. Preparation for defending the DT (content, facts, form), course of defence of the DT. 13. DT treatment ethics, plagiarism.

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_TV	Course name: Field Research
Type, extent and method of instruction: Form of instruction: Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1., 3.	
Level: II.	
Prerequisites:	
Course completion conditions: As part of the course, students will solve assignments from practice (e.g. in cities, municipalities, authorities, non-profit entities, business entities). As long as the terms of the assignment will allow it, authorities from practice will be directly involved in the evaluation. As part of the ongoing assessment, students will be required to participate in field research realized in the form of meetings with relevant subjects from practice, excursions etc. - associated with collecting data in the territories of municipalities or other organizations or in a different form depending on assignments. The number of points to be earned for continuous and final assessment is 100 on the grading scale. Credits are assigned to the student who has obtained a minimum of 65 out of 100 points for fulfilling the requirements of the course assessment. a) continuous assessment: completion of field research to the required extent: 0-50 score b) final assessment: processing of seminar paper: 0-50 score	
Learning objectives: Student after successful completion of the course: <ol style="list-style-type: none"> 1. is able to use the appropriate apparatus of scientific methods when solving a research assignment, 2. is able to independently and methodically correctly solve research assignments, 3. can apply various methods and forms of data collection in field research, 4. assesses the suitability of primary and secondary data processing methods in fulfilling research objectives, 5. is able to evaluate research questions and hypotheses through scientific and mathematical-statistical methods and choose them appropriately for primary and secondary processing data, 6. creates an action plan for field research based on the assignment and research priorities, which will result in a proposal of strategies for solving the research problem. 	
Brief outline of the course: Assigning the research problem. Defining the field research goal and partial goals. Definition of the subject and object of research. Study of relevant literature sources. Determination of research questions and hypotheses. Selection of a suitable apparatus of scientific methods. Selection of research sample. Determination of methods and forms of data collection. Data	

collection. Secondary data processing methods. Methods of primary data processing. Data analysis and evaluation. Strategy proposal / proposal solutions to the research problem. Creating an action plan. Presentation of field research results. Evaluation of the assignment, including peer evaluation.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_FM	Course name: Financial Management
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 / 26 Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 3.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: written exam: 0-45 points, written essay: 0-10 points b) final assessment: written exam: 0-45 points In order to pass the course in the regular term, the student must achieve at least 65 points in aggregate for all components of the assessment. In the repair term, the student will take a repair written test (0-90 points). The number of points achieved for the repair written test is added to the number of points achieved for the written essay.	
Learning objectives: Student is able to: 1. use the acquired knowledge and skills to thoroughly analyze a given problem related to firm's practical financial management, 2. choose suitable structure of firm's sources of finance and decide about their efficient allocation into individual long-term and short-term assets, 3. apply creatively the theoretical knowledge and various methods and tools of financial management in practical business situations related to decisions about sources of capital and its investment, management of financial risk, distribution of financial outcomes, mergers and determination of firm's value, 4. assess advantages and disadvantages of individual methods and tools and is able to distinguish between them and choose those most suitable in given decision-making situation in operational and strategic financial management, 5. critically evaluate current firm's phenomena and achieved financial results, and based on them, is able to make and implement relevant financial decisions and assess their potential implications including the level of international financial transactions, 6. based on the thorough analysis and with the use of the acquired methods and tools of financial management, is able to elaborate proposals for the optimal capital structure, prepare documents for the financial risks management project, profit distribution plan, financial analysis and merger proposal, elaborate simple determination of firm's value and the value of firm's assets.	
Brief outline of the course: 1. Contents and roles of financial management	

2. The firm and its financial environment. The impact of environmental elements on firm's financial management.
3. Financial and capital structure of a firm.
4. Deciding on the firm's structure of sources of finance. The cost of capital.
5. Management of capital investments in fixed tangible and intangible assets.
6. Financial investing and its strategies.
7. Management of working capital.
8. Financial risks and their mitigation.
9. Fundamentals of international financial management.
10. Distribution of financial outcomes and the dividend policy.
11. Financial aspects of mergers.
12. Determination of the firm's value and the value of firm's assets.
13. Specifics of small and medium-sized enterprises' management and fundamentals of entrepreneurial finance.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_TH	Course name: Game Theory
Type, extent and method of instruction: Form of instruction: Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1., 3.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: written test – 50 points (theory and applications of zero-sum 2-player games) b) final assessment: written test – 50 points (theory and applications of non-zero-sum 2-player games and n-player games) Re-sit written test - 100 points (all topics of the syllabus)	
Learning objectives: Upon successful completion of the course, the student is able to 1. use theoretical and practical knowledge of game theory in solving business problems, 2. apply the apparatus of game theory in recognizing the basic properties of economic phenomena, 3. consider the adequacy of selected solution methods in different decision-making situations, 4. properly assess and evaluate the capabilities of each entity entering into decision-making process, 5. make the right decision in terms of game theory in the formation of coalitions and negotiations on profit distribution in decision-making situations with the possibility of cooperation of individual entities.	
Brief outline of the course: 1. Subject of game theory, classification of decision situations, applications. 2. Zero-sum 2-player games - matrix games. Solution in pure strategies. Optimal player strategies. Existence of solutions in mixed strategies. Dominated strategies. Graphic solution. Solution using linear programming. Games against nature. 3. Non-zero-sum 2-player games. Decision making according to cooperative and non-cooperative approach. Non-cooperative approach - Nash Equilibrium Theorem. Cooperative approach - core of game, optimal distribution of payments. 4. Cooperative games of n players. Characteristic function of a game. Imputation - distribution of payments. Dominance of imputations. Shapley value.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: 2d-uVZSP	Course name: General Foundations of Private Law
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2., 4.	
Level: II.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is attendance at a minimum of 90% of the teaching and active participation of students in class. The evaluation is in accordance with the classification scale according to the Study Regulations of Matej Bel University. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The basis for the award of the final grade is the demonstration of mastery of the knowledge of the lecture material, which is demonstrated in an active dialogue with the teacher in the teaching of the subject.	
Learning objectives: The graduate will be able to distinguish private law from public law, will be oriented in the basic principles of private law, which in the European continental legal system traditionally includes civil law, commercial law, family law and international private law. The graduate will have knowledge of the basic institutions of private law (both substantive and procedural), their current legal regulation and use in practice.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_Makro2	Course name: Macroeconomics 2
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 / 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 2.	
Level: II.	
Prerequisites:	
Course completion conditions: The condition for completing the course is passing a combined examination - 2 written tests and an oral exam. a) continuous examination: The student will take two midterm tests during the semester. In the written part of the examination, the student may obtain a maximum of 50 points. b) final examination: The student takes the oral part of the examination during the period for completion of course requirements. The student shall register for the oral part of the examination at the regular time if he/she has obtained at least 25 points from the continuous assessment (out of a maximum of 50 points for both tests). A student may obtain a maximum of 50 points in the oral examination. If the student does not score at least 25 points on the interim assessment, the student will take the final summative test on the alternate examination date. The minimum pass mark, and therefore the condition for completing the course, is set at 65 points out of a maximum total of 100 points (max. 50 points for the tests + max. 50 points for the oral examination). A student is entitled to only 1 remedial term (i.e. for either the test or the oral part of the examination). a) continuous assessment: The student will take two midterm tests during the semester. In the written part of the examination, the student may obtain a maximum of 50 points. b) final assessment: The condition for completing the course is passing a combined examination - 2 written tests and an oral exam. The minimum pass mark, and therefore the condition for completing the course, is set at 65 points out of a maximum total of 100 points (max. 50 points for the tests + max. 50 points for the oral examination).

A student is entitled to only 1 remedial term (i.e. for either the test or the oral part of the examination).

Learning objectives:

Student:

1. is able to use knowledge to search, process and sort information about the macroeconomic environment in the conditions of an open economy as well as economic integration units,
2. is able to analyse macroeconomic phenomena and contexts from the perspective of different economic approaches on the basis of the acquired knowledge, thus developing critical thinking on the one hand and deepening his/her understanding of the complexity of economic processes in the macroeconomic environment on the other hand,
3. is able to apply his/her knowledge in order to identify in practice the impact of the action of the main factors originating from the macroeconomic environment on selected economic agents in order to model future situations, thus better preparing him/her for decision-making under conditions of risk and uncertainty,
4. be able to assess the practical application of economic policy instruments to address important macroeconomic problems,
5. be able to evaluate the most important patterns of economic development in the current globalised environment with regard to their implications for households and businesses.

Brief outline of the course:

Keynesian economics: price and wage rigidities. Classical analysis of business cycles: macroeconomics of market clearing.. Equilibrium output in a closed economy. The IS-LM model and its applications. The Mundell-Fleming model and its applications. Fiscal and monetary policy in a small open economy and coordination between them. Labour market and unemployment. The AD-AS model and its applications. Inflation, disinflation and the Phillips curve. Theories and models of economic

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_PrM	Course name: Project Management
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: elaboration of a project and its presentation during seminars or elaboration of practically oriented tasks during seminars or individually: 0-20 points b) final assessment: Written exam: 0-80 points Number of points earned for continuous and final evaluation to correspond to 100% on the grading scale. Passing grades are received for students who have obtained over 65% in the final assessment. In the resit exam the student needs to pass only a written exam, the points gained during seminars will be added to his/her final assessment.	
Learning objectives: After completion of the course, the student can: <ol style="list-style-type: none"> 1. define project objectives and develop a detailed project schedule in the form of a project plan, 2. create a hierarchical structure of project activities, project timetable, and resources for the project, in an application software to support project management, 3. apply the principles of teamwork in creating and managing project teams, 4. apply selected methods and tools to project management with optimization of the project activities, 5. assess the degree of risk associated with the project and assess the progress of the project, 6. evaluate the feasibility of the project before its implementation. 	
Brief outline of the course: <ol style="list-style-type: none"> 1. The definition of project and project management. 2. Project management standards and certification of project managers. 3. Classification of projects and project life cycle. 4. Defining project goals and project planning. Project implementation and organization of project activities. 5. Controlling and managing project risks. 6. Project funding. 7. The tasks of the project manager and project team work.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: D_2_KaKVvP	Course name: Qualitative and Quantitative Research in an Enterprise
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1.	
Level: II.	
Prerequisites:	
Course completion conditions: a) continuous assessment: written examination qualitative research - 10 points written examination quantitative research - 20 points b) final assessment: the sum of all continuous assessment values, while the critical requirement for the course completion is to achieve the minimum of 65% in each of the previous assignments. In the resit term, the student will retake the written examination of the part of the course in which he/she did not achieve the required minimum number of points.	
Learning objectives: 1. is ready to consult with the research assignor, and come to common understanding of basic components of the research assignment, 2. uses existing knowledge published in specialized literature to formulate theoretical foundations of his/her own research, 3. chooses suitable methods within the context of the studied problem and prepares the technique of collection of data, 4. identifies the basic set of respondents within the context of the studied problem, evaluates representativeness of the selected set, validity of the questionnaire, and its reliability, 5. applies suitable statistical methods into data processing, and extracts information necessary for the solution of the studied problem, 6. creates simple models enabling prognosis of development of economic values in time.	
Brief outline of the course: Introductory analysis of the research assignment – specification of the problem, subject, purpose and goal, including the object. Theoretical analysis of the problem – theoretical foundations and usable interpretation concept, formulation of the main, as well as partial, questions (the main and the partial hypothesis) as the basis for the following steps. Elaboration of the methodology, including suitable tools (techniques) of data collection – principles and the procedure of creating a questionnaire. Verification of representativeness of a set of respondents. Descriptive statistics and visualization of ordinal and qualitative data. Analysis of contingency tables. Chosen non-parametric tests. Introduction to analysis of time series.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: 2d-vdsl-02	Course name: The Great Works in World Literature II
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2., 4.	
Level: II.	
Prerequisites:	
Course completion conditions: The student prepares an essay in which he/she takes a position on the issue discussed. The final assessment is passed/failed.	
Learning objectives: 1. The student will obtain an adequate overview of the origin and functioning of selected representative literary works from several civilizational and cultural areas from medieval literature to contemporary literature; will improve in professional terminology. 2. The student will acquire the specific interpretation skills necessary when working with a literary text anchored in a radically different cultural environment, thereby strengthening tolerance towards cultural differences and the will to respect the right to be different. 3. The student is able to conduct research on the assigned topic, can identify reliable sources, select relevant information from them and present it to others in a clear and useful form. 4. The student will acquire an organized sum of knowledge and a more widely applicable set of useful habits, methods, approaches, competences applicable in the interpretation of literary and non-literary texts or other cultural phenomena from various cultural periods.	
Brief outline of the course: Some of the greatest works of the European literature from the Middle Ages to the present day will be presented. It will be a selective selection of the presentation of literary worlds and the values they created. The Divine Comedy as the main work of the Middle Ages or the Renaissance? The Middle Ages as the "cradle" of European culture and education. Testaments enfant terrible. The spiciness of the Decameron and Laura's ephemerality. From Shakespeare to French classical drama. Playwrights and their (non)dramatic characters. Fairy tales that changed the world. Shock the bourgeois! Avant-gardes in world art. Literature as a place for women. On Freedom, Being and Apricot Cocktails: Existentialism in World Literature. Crazy for Life: The Beat Generation and Their Followers. Great works in small publishers.
