Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_MO	Course name: International Trade
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 52s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 4.	
Level: I.	
Prerequisites:	
Course completion conditions: b) final assessment: Written exam: 0 - 100 points Number of points earned for continuous and final evaluation to correspond to 100% on the grading scale. Passing grades are received for students who have obtained over 65% in the final assessment. In the resit exam the student needs to pass only a written exam, the points gained during seminars will be added to his/her final assessment.	
Learning objectives: After completion of the course, the student can: 1 scan, process and analyse information about international and foreign trade from various sources, 2 controls the process of foreign trade operations, export and import, knows the conditions of international transportation and international trade terms Incoterms 3 applied methods and techniques for analysingf foreign market 4 is able to communicate its conclusions, supported by knowledgeable experts both clearly and unequivocally, 5 assess the most appropriate form of entry into a foreign market for a specific undertaking, 6 evaluates the potential risks arising from the activities of foreign business 7 establish a baseline analysis of foreign markets for a particular product.	
Brief outline of the course: 1. International and foreign trade. 2. Foreign trade development in Slovakia. 3. Export promotion in Slovakia. 4. Methods and techniques of analyzing foreign markets. 5. Deciding on entering the foreign market. 6. Import and export business operations. 7. Deciding on the marketing program. 8. Customs procedures for export and import goods. 9. International transport of goods, insurance contracts. 10. Legal services and INCOTERMS. 11. Documentary payments in international trade.	

12. Non-documentary payments in international trade.						
13. Risks in international trade.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_UdEI	Course name: Introduction to European Integration
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 3., 5.	
Level: I.	
Prerequisites:	
Course completion conditions: a) mid-term evaluation: oral presentation of the selected topic during the seminars - 30 points, active participation on seminars and assessment of the paper of other colleague - 30 points b) final assessment: written test - 40 points	
Learning objectives: student a. applies knowledge to search, process and sort information on the foundations of integration in Europe today and in the context of its historical development b. on the basis of the knowledge acquired, is able to orientate himself/herself on current issues related to the economic side of integration processes c. applies his/her knowledge in order to identify in practice the impact of the EU internal market and selected EU policies on different economic actors d. assess the practical application of selected European Union legislative instruments in addressing important economic issues.	
Brief outline of the course: Theoretical foundations of integration. History of European integration. Introduction to EU law and institutional system. EU budget. Monetary integration in Europe. Monetary policy in the euro area - current trends. Current issues in the European integration: BREXIT, pandemic shock, digital transformation, green transformation, innovative business environment within the EU. External economic relations and current position of the EU in the world economy,

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_ZM	Course name: Introduction to Mathematics
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 1.	
Level: I.	
Prerequisites:	
Course completion conditions: final assesment: written test: 0 -100 points	
Learning objectives: Complementing and repeating the knowledge of secondary school mathematics that is needed to master the courses Mathematics and Statistics. The course is intended primarily for graduates of secondary and grammar schools who have a weaker mathematical background. After successful completion of the course, the student will be able to: <ul style="list-style-type: none"> - use basic knowledge of secondary school mathematics in the study of mathematics at universities, - to explain in detail the issues mentioned in the course syllabus, - calculate appropriate types of tasks, - use basic mathematical apparatus. 	
Brief outline of the course: <ol style="list-style-type: none"> 1. Sequences, arithmetic and geometric progressions. 2. Functions - properties and domain. 3. Constant, linear, quadratic, exponential, logarithmic and power functions of one variable. Inverse function. 4. Linear, quadratic, exponential and logarithmic equations and inequalities. Irrational equations. Equations and inequalities with unknown in denominator. Simultaneous equations and inequalities. 	
Recommended literature: <ol style="list-style-type: none"> 1. KADLEČKOVÁ, M. – ZIMKA, R. 2006. Požiadavky na prijímacie skúšky. Banská Bystrica: EF UMB, 2006. 201 s. ISBN 80-8083-199-8. I. Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_UdSnVSa	Course name: Introduction to Studying at University - Adaptation
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 1.	
Level: I.	
Prerequisites:	
Course completion conditions: a) interim evaluation b) final written test In total, a student may earn a maximum of 100 points for all the requirements. The minimum pass mark is 65 points.	
Learning objectives: Student: <ol style="list-style-type: none"> 1. is thoroughly informed about the university environment and can navigate through it. 2. understands the university system of study and is able to cope with new requirements. 3. understands and accepts the organisational, technical, social and cultural aspects of university study and socialises successfully. 4. learns the differences and specifics of studying at university, is able to modify his/her study style, understands the nature of studying as a process and its prerequisites. 5. adapts effectively to university study and adjusts to the HE environment of the college and university. 6. becomes familiar with selected basic study skills such as note-taking, reading and working with information, oral and written expression, and effective exam preparation. 7. successfully manages the different phases of adaptation, the knowledge and psychological load placed on first year students in the Bachelor's degree. 	
Brief outline of the course: Adaptation to higher education and its importance. Stages of adaptation. Principles of effective adaptation. Means and aids of adaptation to HE studies - adaptation mirror, adaptation difficulties and their management. Studying as a process and its prerequisites - wanting, being able and knowing how to study. Self-management and its importance in the student's life. Making quality notes for studying. Effective reading and working with professional text. Fundamentals of written and oral expression. Acquisition and processing of professional information. Preparation for and successful completion of examinations (principles, prerequisites, coping with mentally demanding situations, applied psycho-hygiene.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_PrPr	Course name: Labour Law
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 4.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition for successfully passing the course is the preparation of a written project, processing of an essay, elaboration and submission of a seminar work and passing the final written test. The student must complete all parts of the preliminary/continuous and final assessment. The student takes the final written test at the end of the semester in the period designated for the fulfillment of study duties. The student prepares and submits a written project, an essay and a seminar work during the semester. The maximum number of points obtained for continuous assessment (written project, essay, seminar work) and final evaluation (final written test) is 100. The minimum threshold for success, and thus the condition for successful completion of the course, is set at 65 points. If the student does not pass any of the components of the continuous assessment (written project, essay, seminar work), he / she cannot participate in the final written test. In this case, he / she takes a corrective test consisting of the entire curriculum. The minimum threshold for passing the corrective test is set at 65 points. a) continuous assessment: written project: 0 - 15 points, essay: 0 - 5 points, seminar work: 0 - 10 points b) final assessment: final written multiple-choice test: 0 - 70 points	
Learning objectives: After completion of the course, the student <ol style="list-style-type: none"> 1. is able to use appropriately the theoretical knowledge of labour law in the conditions of the public and private sectors and to recognize specific features of legal regulation from the point of view of the basic legal sources in these fields, 2. is able to orient oneself in the basic legal regulations governing employment relations in terms of their content, understands the basic principles on which this legislation is based, can identify, clarify and assess the basic relations regulated by labour law, 3. is able to apply correctly the legal norms of labour law to individual cases in private companies, but also in public sector organizations and institutions, 4. is able, at a basic legal level, to assess decision-making processes in the context of employment relationships, including liability, and the social and ethical contexts that can be inferred from a wrong decision; 	

5. is able to responsibly judge the importance of human resources in a market economy, as well as the fundamental rights and obligations of employees and employers in the implementation of the employment in the private and public spheres,
6. is able to deal effectively with the solution of economic and legal problems arising in the implementation of the right to work, to develop a basic overview of labour legislation to such an extent that he / she can make decisions, formulate and communicate conclusions in this area and can distinguish when it is necessary to ask for a legal aid.

Brief outline of the course:

Labour law as an independent legal branch of the legal order of the Slovak Republic. The influence of international agreements and European law on labour relations in the Slovak Republic. Principles of labour law. Interdict of discrimination Basic sources of labour law in private and public sectors, their systematics and content orientation. The position of citizens in implementation of right to work. Labour relation, commencement, changes and termination of employment. Fundamental parts of employment relation. Rights, duties and responsibility of employee and employer in labour and legal relations. Collective labour and legal relations. Employment protection.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_Makro1	Course name: Macroeconomics 1
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 52s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: During the semester, the student takes two written tests of 30 points each. The minimum number of required points from both written tests is 35. If the student does not reach this limit, he must directly use the possibility of a corrective written exam. Students who pass the written part of the exam will be invited to take the oral exam. The possible number of points achieved for the oral exam is from 0 to 40 points. In the final evaluation, points from the written tests and the oral part of the exam are counted. At least 94 points are required to obtain an A rating, at least 87 points to obtain a B rating, at least 80 points for a C rating, at least 73 points for a D rating and at least 65 points for an E rating.	
Learning objectives: Student: <ol style="list-style-type: none"> 1. knows the theoretical basis of the current macroeconomics based on models of balance, economic performance and economic policy, which uses not only in further study, but also in the economic and social reality, 2. is able to name, analyze and interpret macroeconomic phenomena that affect the behavior and decision-making of all economic entities in a real functioning economic system, 3. applies critical analysis in the evaluation of economic phenomena and processes, can specify and propose measures for decision-making processes and work with economic policy instruments, 4. reflects and assesses the development of economic thinking, changes in the macro environment and the role of the state in the economy, 5. assesses the fulfillment of macroeconomic objectives and the application of economic policy instruments, confronts macroeconomic theory with economic practice, 6. formulates its own views on economic and political events, can make economic and political decisions and is responsible for them. 	
Brief outline of the course: Economic development in the first half of the 20th century. Monopolization of the economy and the economic crisis in the 1930s. Keynesian learning and the origin of macroeconomics. State functions in the economy, market failures and state failures. Basic macroeconomic concepts. Macroeconomic objectives and instruments. Potential product. Macroeconomic balance. Economic performance. National aggregates, methods of their measurement. Consumption, saving and investment. Multiplier effects. Economic growth, sources and measurement of economic growth.	

Business cycle, types and causes of cyclical development. Banking system, money creation and money market. Unemployment. Inflation. Basic principles of monetary policy. Basic principles of fiscal policy. Basic principles of foreign trade policy. Foreign exchange market. External economic relations.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_ZMZ	Course name: Managerial Skills - Basic
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 4., 6.	
Level: I.	
Prerequisites:	
Course completion conditions: Credits will be awarded to a student who has achieved at least 65 out of 100 points in both parts of the evaluation. a) continuous assessment: active participation at seminars (0-20 points) b) final assessment: semestral project - according to the situation either presentation with the use of activating forms of education (0-80 points) During presentations and following discussions students will use mutual evaluation (feedback) with the duty to formulate appreciation or constructive criticism.	
Learning objectives: After successful completion of the course, the student: <ol style="list-style-type: none"> 1. adopts interpersonal skills necessary for fulfilment of basic manager duties 2. evaluates connection between manager skills and tasks with interconnection on competencies and positions of managers 3. can communicate important information and facts in the field of managerial procedures in organisation 4. applies knowledge and gained skills in preparation of frame basic documents for decision processes in selected organisations of private, public and non-profit sector 5. can adjust own behaviour in the relationship with colleagues, customers and business partners in different social situations in formal as well as in informal relationship 6. can plan, organise chosen business events at sufficient level. 	
Brief outline of the course: Functions of management and managerial roles. Personable characteristics and ability to work as a manager. Personal development and self-management. Specifics of managerial work in public and non-profit sector. Basic managerial skills – interpersonal, conceptual, technical and communication skills. Rules of efficient communication, mistakes and bad habits in communication. Feedback and its importance in managerial work – critique and constructive feedback, importance of appreciation and recognition. Efficient manager. Ethics and etiquette in managerial work, rules of social behaviour in different situations, preparation and organisation of meetings. The importance of cooperation and teamwork, problems and their solutions – simulation and role play.	

At the beginning of the semester, students identify their strengths and weaknesses for managerial work, formulate concrete steps and work continuously on improving their weaknesses. During the semester students in teams train skills through multiple managerial games and tasks, they solve problems under limited time, apply time management, practise communication skills, and learn how to give mutual feedback.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_Mark	Course name: Marketing
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 52s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 4.	
Level: I.	
Prerequisites:	
Course completion conditions: a) continuous assessment: continuous assessment: 0 – 40 points: solving assigned partial tasks and case studies during seminars, elaboration and presentation of group work b) final assessment: final assessment 0 – 60 points: test Credits are assigned to the student who has obtained a minimum of 65 out of maximum 100 points for fulfilling the requirements of the course assessment. Specific grades follow the classification levels according to final number of achieved points (A-FX). Within resit examination, student repeats that part(s) of the assessment (test or case study) in which he/she gained lowest number of points, to achieve the final sum of at least 65 points.	
Learning objectives: After completion of the course, the student: <ol style="list-style-type: none"> 1.Student adopts and understands basic terms and theoretical concepts in marketing and its importance for business 2.Understands principles and application possibilities of marketing in different types of businesses, subjects and industries 3.knows new trends in this field 4.is able to identify and gain information about marketing environment of the business 5.has the ability to analyse marketing environment of the business with the use of chosen methods, tools and techniques, 6.can create marketing offer with the tools of marketing mix in relation to target market, 7.demonstrates analytical, critical and creative approach 8.is able to work in teams and solve basic marketing problems in practice, 9.is able to present and defend own solutions supported by arguments based on previous analyses. 	
Brief outline of the course: Basic terms in marketing. History and importance of marketing in the activities of an enterprise. Development of business orientations and marketing concepts. Marketing analysis – factors of external macro environment and subjects of external microenvironment, competition analysis.	

Marketing research - information needs, types of marketing information, managing marketing information.

Consumer behaviour, decision-making process of the customer, factors determining this behaviour. Business buying behaviour in industrial markets, models and factors. Differences between B2C and B2B markets.

Market segmentation (its criteria and process) in the context of STP process.

Essence, content and analysis of marketing mix tools in an enterprise, extended marketing mix.

Product classifications, product analysis and product strategies.

Pricing methods in marketing, factors, strategies and tactics.

Distribution channels, factors and strategies.

Marketing communication mix and its particular tools.

Process of marketing strategy development, content of marketing plan.

Application of marketing in specific areas: international marketing, marketing of services, marketing of non-profit organizations, industrial marketing. New trends in marketing.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_Matem	Course name: Mathematics
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 52s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: a) continuous assessment: Written test of linear algebra and function of one real variable and their applications - 40 points (problem solving - 30 points, theoretical questions - 10 points) For active, quality work and for the elaboration of short online tests via LMS, the student can get a maximum of 10 bonus points during the teaching part of the semester. b) final assessment: Written test of differential and integral calculus of functions of one and two real variables and their applications - 60 points (problem solving - 48 points, theoretical questions - 12 points) The grade in due time is determined on the basis of the sum of points from both tests and bonus points for active work. Corrective term: Written test of the entire syllabus – 100 points (problem solving - 80 points, theoretical questions - 20 points) The grade in the corrective term is determined on the basis of the sum of points from the re-sit test and bonus points for active work during the teaching part of the semester. At the request of the examiner, the student is obliged to pass an oral examination in order to verify the used procedures in a written test. On the basis of the oral examination, the examiner decides on the allocation of points for the relevant test. If the oral examination is refused, the student will be awarded an FX grade. During the elaboration of tests and oral examination, the student can only use a personal calculator as an aid. When performing written tests and oral examination by the distance method, it is necessary to register the student for the relevant event in the MS Teams calendar and turn on the camera and microphone on his communication device. Any description, recording or performance of tests, use of illicit aids as well as means of communication, or other impairment of the objectivity of the assessment will be considered as non-compliance with the conditions for passing the course.	
Learning objectives: Student 1. demonstrates basic knowledge of limit, differential and integral calculus of a function of one variable and two variables, of solving systems of equations and of matrix calculus, 2. can explain the interrelationships between the knowledge gained,	

3. is able to creatively use the acquired knowledge in the study of professional subjects and in the search for effective ways of solving theoretical and practical tasks,
4. is able to correctly interpret the obtained solutions of tasks with respect to the researched economic issues.

Brief outline of the course:

Linear algebra. Function of one real variable. Differential calculus of a function of one variable and its application in economics. Function of two variables. Differential calculus of a function of two variables and its application in economics. Integral calculus and its applications in economics.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_DotPr	Course name: Questionnaire Survey
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 6.	
Level: I.	
Prerequisites:	
Course completion conditions: a) continuous assessment: construction of a questionnaire (10%), online form of the questionnaire (10%), data collection (10%), recoding of the database (20%), verification of representativeness and description of the sample (50%) b) final assessment: the final grade is derived from the total sum of points gained from individual parts. The student may revise any part of the overall assessment in the resit term.	
Learning objectives: Student <ol style="list-style-type: none"> 1. is able to create a correct questionnaire in accordance with the factual, formal and statistical requirements for its content and structure and in the connection with the research objective, 2. creates an online form of the questionnaire, 3. identifies the type of variable that the question generates in the questionnaire and introduces the coding of the response in accordance with the type of variable, 4. creates a formally and content-wise correct database of answers to the questions in the questionnaire in a spreadsheet processor, which will be processed by the statistical program, 5. understands how to process a multi-choice question; 6. uses the correct statistical procedures in statistical program for exploratory analysis and for testing of representativeness of the sample, 7. is able to summarize, graphically present and correctly interpret the obtained results. 	
Brief outline of the course: Preparation of a questionnaire in connection with the goal and hypotheses of the bachelor's thesis, methods and techniques of data selection and collection, determining the range of the sample. Classification of surveyed data - quantitative, ordinal and nominal variables, preparation of a data file in spreadsheet processor, creation of an online questionnaire in freeware applications. Import of the database of responses into statistical software package and settings of variables for further processing. Exploratory analysis. Testing of the representativeness. Presentation and interpretation of obtained results.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_Socio	Course name: Sociology
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1., 3.	
Level: I.	
Prerequisites:	
Course completion conditions: Successful completion of the course requires the acquisition of knowledge in the scope of the content of the course. At the same time, it is important to be actively and critically involved in the thematic discussions. The student is able to apply the acquired sociological knowledge and skills to the conditions of business practice. The student has the opportunity to use a regular and corrective deadline for the final verification of the acquired knowledge. He completes the correction term from the half of the semester which he did not meet. a) continuous assessment: Continuous assessment takes the form of a written test. The point rating is 0 - 50 points. b) final assessment: Final assessment takes the form of a written test. The point rating is 0 - 50 points. Credits will be awarded to a student who has achieved at least 65 out of 100 points in both parts of the evaluation.	
Learning objectives: After completion of the course, the student: 1. has acquired the basic sociological terms and categories with the emphasis on their effect in current sociological disciplines, which helps the student to acquire knowledge in other disciplines of social sciences, 2. is able to understand and interpret sociological phenomena which constitute a broader frame and interpretation concept of business activities and the work of a manager, 3. can apply theoretical sociological knowledge in executing managerial tasks at basic and middle levels of management, mainly while working with the human factor, e.g. with different types and kinds of working groups, 4. is prepared to choose suitable methodological approach in pre-empirical and empirical phases of simple analytical and research activities, 5. can evaluate and use influence of wider social conditions at business activities of an enterprise, 6. forms a more specific and more detailed opinion about elements, principles, context, and concept of origins, conditions and forms of functioning of larger social units, social life in these units, as well as the phenomena and processes, which result from mutual influence of social subjects.	
Brief outline of the course: Sociology as a science. Sociological disciplines. Basic sociological terms, society, social units. Social phenomena and social processes in general. Social phenomena and social processes at work, in business, and in management. Social change. Social groups in general and at work,	

in business, and in management. Phenomena and processes in social groups and clusters. Organizations and institutions. Social communication. Methodology of sociological research, basic terms, preempirical and empirical phase of a research. Possibilities to use sociological methodology in analyzing working environments, business and management.

Recommended semester/trimester: 1., 3., 5.	
Level: I.	
Prerequisites:	
Course completion conditions: Number of points obtained for continuous and final evaluation is 100. This corresponds to the grading scale evaluation. Credits are assigned to the student, who receives at least 65 of 100 points for the implementation of the intended conditions a) continuous assessment: written test: 50 points b) final assessment: presentation of a prepared business or investment strategy: 50 points	
Learning objectives: Through this course, students will gain extensive knowledge particularly about the possibilities of managing individual savings. They will be able to assess the quality of available financial products in the market and even develop suitable individual alternatives. Through this subject, students will learn techniques such as creating and testing trading and investment strategies, as well as methods to assess and evaluate their quality. Through their own trading platform, which gives you access to the global financial markets, they will learn the business of entering and executing orders for buying and selling financial instruments. Finally, through this course, students will gain knowledge about the legislation and tax aspects and its financial impact on trades.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: E_1_OaI2	Course name: Trade and Investment 2
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2., 4., 6.	
Level: I.	
Prerequisites:	
Course completion conditions: Continuous assessment: 1. Project on the topic covered in the course - 50 points. 2. Written test in the last week of the semester - 50 points. The student may earn additional points for active and creative participation in individual seminars. Final assessment: To successfully complete the course, it is necessary to obtain a total of at least 65 points from the continuous assessment. The final grade will be determined in accordance with the evaluation scale.	
Learning objectives: The aim of this course is to expand and deepen the knowledge acquired in the previous course "Trading and Investing 1". Students will learn how to analyze financial markets with even greater precision and in more detail, what the new trends and technologies are in trading and investing, and what were the causes and consequences of past financial crises. They will also learn how to use advanced technical and fundamental analysis tools, as well as advanced investment and trading strategies. Thanks to the course, students will also gain the necessary knowledge to build complex trading and investment strategies that combine not only fundamental and technical analysis, but also become familiar with working with specialized platforms for building AOS. As part of the course, students will also gain knowledge about the use of artificial intelligence in trading and investing, and they will also learn about less known aspects of trading and investing in the global financial markets.	
Brief outline of the course: 1. Financial derivatives, leveraged trading 2. Distribution of ETFs, special types of ETFs 3. New trends and technologies in trading and investing 4. Blockchain and cryptocurrencies 5. Portfolio diversification 6. Financial crises - causes and consequences 7. Use of macroeconomic indicators in trading and investing 8.
