Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_AsaUTn_AJ	Course name: Authorship or co-authorship of a teaching text (over 1 AS)
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 15	
Recommended semester/trimester: 1., 2., 3., 4., 5., 6., 7., 8..	
Level: III.	
Prerequisites:	
Course completion conditions: Writing as an author or co-author of a teaching text (scripta) in Slovak or a foreign language in print or electronic form.	
Learning objectives: After completion of the course, the student can: <ol style="list-style-type: none"> 1. use the acquired knowledge and skills in their research and teaching activity 2. apply the proposed writing methodology in the creation of teaching texts 3. critically evaluate the content match of the teaching text with the curriculum and syllabus of the relevant course 4. create in co-authorship a teaching text published in print or electronic form meeting the formal and publishing requirements of applicable standards. 	
Brief outline of the course: A teaching text is a publication for university students, published in printed or electronic form, which is usually intended to temporarily replace a missing university textbook. It must go through an official publication process, meet the criteria of a generally published publication and all formal and publishing requirements of applicable standards. The content of the teaching text must match with the curriculum and syllabus of the relevant course. The teaching text can have the form of: instructions for exercises, collections of examples, manuals to deepen and clarify the cross-sectional curriculum.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_Cd_AJ	Course name: Citation at home
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 1	
Recommended semester/trimester: 1., 2., 3., 4., 5., 6., 7., 8..	
Level: III.	
Prerequisites:	
Course completion conditions: Citation at home (except for self-citation) of a publication published in the authorship or co-authorship of a doctoral candidate registered in the University Library of the MBU.	
Learning objectives: Doctoral candidate by citation at home: <ol style="list-style-type: none"> 1. demonstrates its ability to publish research results of importance to the domestic scientific community; 2. demonstrates the skills acquired in the preparation of a scientific publication that achieves adequate readability and citation at home; 3. achieves the competence to communicate with the academic community and to disseminate research results in an effective way, including citing these research results at home; 4. proves that he/she has become a member of the scientific community at home. 	
Brief outline of the course: Citation, forms and types of citations in scientific literature. Citation as part of scientometrics. Open access (what is open access, reasons of its origin, copyright, and open access, publishing in the form of open access, opportunities, threats, and predators) and its opportunities to increase the citation rate of publications. Possibilities of increasing the readability and citation rate of publications (participation in domestic conferences, publishing in top-quality peer-reviewed scientific journals, use of social media, and professional networks/platforms for dissemination of publications). Active search for citations of own publications and possibilities of their monitoring and evaluation. Evidence of citations in the University Library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_SaMz_AJ	Course name: Co-authorship of a monograph (abroad)
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 20	
Recommended semester/trimester: 1., 2., 3., 4., 5., 6., 7., 8..	
Level: III.	
Prerequisites:	
Course completion conditions: To elaborate one author sheet as a co-author of a scientific publication in a printed or electronic form, that being in English languages and published by a foreign publisher. .	
Learning objectives: The student <ol style="list-style-type: none"> 1. uses the acquired knowledge and skills in proofreading and editing a scientific publication and improving the applied research methodology, 2. is able to implement the proposed methodology in creating a scientific work, 3. applies the proposed methodology in processing the data by selected statistical methods and statistical programs, 4. critically evaluates the obtained results, and synthesizes the previous knowledge related to the given topic, and 5. co-authors a scientific publication published in printed or electronic form, which provides a complex, comprehensive, holistic, and systematic analysis of one topic, scientific problem, or an aspect of a scientific field including all views of the given topic. 	
Brief outline of the course: The scientific monograph explains one, normally a narrowly specified problem from general, systematic, detailed, and holistic points of view. In writing the monograph, the author, or group of authors, use, critically evaluate, and synthesize the previous knowledge regarding the topic, while enriching it in new information, being the result of the author's (authors') own scientific work. The monograph contains the author's (authors') own contribution with regard to the topic, and the conclusions made from the research. A carefully processed scientific apparatus is integral to the scientific monograph.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: 3_EaMS_AJ	Course name: Economy and Management of Services
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 20s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2., 4.	
Level: III.	
Prerequisites:	
Course completion conditions: (a) Continuous evaluation: semester project: 60 points (b) final assessment: defense of the project in a colloquium: 40 points	
Learning objectives: Student 1. applies the learning outcomes to uncover and analyse the basic economic categories of services and their economic characteristics; 2. is able to understand the rationale for the growth of the service sector in all economic and managerial contexts and applies knowledge of the assessment of the concentration and competitiveness of service sector industries down to the level of specific companies; 3. applies theoretical knowledge and international experience to development studies of selected service industries; 4. be able to assess the international position of Slovakia in indicators showing the volume and structure of services and their development, assess absolute and relative comparative advantages in the service sector, assesses the objective requirements and the realistic possibilities of meeting these requirements by individual non-market - public service sectors and assesses the economic implications of the existence of collective goods. 6. in the process of acquiring theoretical knowledge about services and their development, create an objective diagnosis of the state of the service sector through the macro, meso and micro level.	
Brief outline of the course: Definition of services. Service as a system. Characteristics of services (general and specific). Asymmetric information. Classification of services, especially public services. Determinants and aspects of demand. Macroeconomic implications of the relative growth of the service sector. Macro, meso and micro approach to the study of services. Globalization, competitiveness of service sector industries, concentration (HHI) and comparative advantages in the service sector. Technology and technology in services. Human factor in services. Structural changes in the economy and the growth of services. Developmental features and restructuring of services. Indicators of the position of services in the economy. Valuation of service production. Market and non-market services. Service collectivity vs. public good. Production, provision, delivery of public services. Non-market-public service sectors.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_ZM1_AJ	Course name: International Mobility 1
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 20s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 1., 3., 5.	
Level: III.	
Prerequisites:	
Course completion conditions: Evaluation: 100% implementation of an individual mobility project, certificate from the host institution, elaboration of the final mobility report - a total of 100 points	
Learning objectives: <ol style="list-style-type: none"> 1. Mobility in abroad allows doctoral students to travel abroad for study or training purposes with regard to the focus of the topic of the dissertation; 2. increase publishing opportunities; 3. development of professional, social and intercultural skills; 4. greater chance of finding a job on the labor market, gaining a better idea of what career path to pursue, increasing competitiveness and employability; 5. improving language skills; 6. enhancing digital skills; 7. acquisition of transferable skills. 	
Brief outline of the course: Encouraging doctoral students to spend at least part of their studies at universities outside their country. The purpose of foreign mobility is to acquire a broader knowledge of professional terminology in a foreign language, to increase the probability of publishing in cooperation with foreign partners. The scope of continuous foreign mobility is at least 1 month. Foreign mobility can also be implemented in the form of e-mobility. The doctoral student contacts his / her supervisor electronically at least once every two weeks and briefly informs him about the course of the stay. International mobility may be carried out for studies, research, summer schools and internships. The study and research stay is carried out at a public educational and research institution of your choice. The internship host institution can be any public or private organization active in the labour market. Foreign mobility can be implemented within mobility programs (eg National Scholarship Program, Erasmus +, CEEPUS, Fulbright, DAAD, Austria-Slovakia Action, Visegrad Fund, Central European University, Slovak Academic Information Agency, government scholarships resulting from bilateral intergovernmental cooperation agreements , AIESEC). Doctoral students follow the criteria and conditions set for the scholarship program.

Course completion conditions: a) continuous assessment: semestral project: 0-50 points b) final evaluation: project presentation and its defense within the colloquium: 0-50 points The maximum number of points obtained for the interim and final evaluation is 100. It corresponds to the classification scale of the evaluation. Credits will be awarded to a student who has obtained following the requirements at least 65% of 100 points.	
Learning objectives: Student: <ol style="list-style-type: none"> 1. is able to obtain data, work with data (primary, secondary, open), visualize data and interpret data in creating strategic documents, professional and scientific articles and policy papers, 2. is able to search for open data and critically assess them on the basis of acquired knowledge, 3. can apply key knowledge by identifying the suitability of data, present and apply relevant data, assess their significance and, based on their qualified assessment, use them in creating strategic documents, professional and scientific articles and policy papers, 4. is able to formulate a vision, goals, tools, measures for the implementation and audit/control of strategic documents on the basis of data assessment in terms of the current state and needs of the future, 5. can use open data in creating and processing of professional and scientific publications, 6. can create starting points for decision-making and management processes at the top level in firms and in private, public and non-profit sector, 7. is able to communicate and present information, own attitudes, problems and proposed solutions. 	
Brief outline of the course: Open data (OD) – their meaning and content. Importance of OD (bureaucracy elimination, transparency, planning, management). OD as a part of smart governance and open governance. OD management. OD as a strategic management tool. Data collection. Data processing. Data visualization. Data evaluation. Use of open data in strategic development. OD in public policies. New principles of data management, publishing and evaluation (applications, tools, portals, data catalogues, datasets, filtering, map portals, data publishing formats, etc.). Creation of a project from open data in relation to the topic of dissertation thesis and development of presentation skills necessary for its defense.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_PrVCz_AJ	Course name: Paper in a reviewed scientific journal (abroad)
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 15	
Recommended semester/trimester: 1., 2., 3., 4., 5., 6., 7., 8..	
Level: III.	
Prerequisites:	
Course completion conditions: A paper in a reviewed scientific journal abroad published in the authorship or co-authorship of a doctoral candidate registered in the University Library of the MBU.	
Learning objectives: Doctoral candidate by publishing a paper in a reviewed scientific journal abroad: <ol style="list-style-type: none"> 1. demonstrates its ability to provide important knowledge or theoretical background on the basis of its own previous research, applicable in an international context, 2. demonstrates the skills acquired in the preparation of the scientific paper in English, 3. achieves the competence to communicate with the academic community and disseminate research results abroad, 4. proves that he/she has become a member of the international scientific community. 	
Brief outline of the course: Scientific paper and its structure. Sources of information for scientific work. Bibliographical references. Cooperative writing. Scientific and publishing ethics. Selection of a reviewed scientific journal. Indexed journals. Predatory journals. Review procedure. Open publishing. Evidence of publishing activities. Scientometry.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_MVYR_AJ	Course name: Production Management
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 20s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2., 4.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: Semester work and its presentation (maximum 50 points). The topic of the semester work is related to the topic of the dissertation thesis and has an appropriate overlap with the issue of production processes or related issues focused on production and production systems. b) final assessment: Colloquium exam (maximum 50 points). The colloquial exam takes place with the participation of all students, while the question is always asked to only one student, and after answering it, all participants in the colloquial exam can complete the student's answer or respond with a discussion paper related to the question. The assessment of the colloquium exam consists of the assessment of the student's answer and the extent of his involvement in the discussion of other questions.	
Learning objectives: After completion of the course, the student: <ol style="list-style-type: none"> 1. can define the production system, 2. knows the classification and basic attributes of pre-production, production, post-production and cross-production processes, 3. knows the links of the production system to other functional areas of the company, 4. knows the principles of Industry 4.0., 5. knows the classification of intelligent technologies applicable in production processes, 6. knows the principles and methods of lean production, 7. knows the basic attributes of production technologies, 8. can simulate production processes, 9. knows the principles of digitization of production systems. 10. can apply the knowledge of production management with regard to the focus of the topic of the dissertation. 	
Brief outline of the course: Definition of production system, classification and basic attributes of pre-production, production, post-production and cross-production processes, linking of production system to other functional	

areas of the company, definition and principles of Industry 4.0., classification of intelligent technologies applicable in production processes, application areas of intelligent technologies in production systems, principles and methods of lean production, basic attributes of production technologies, simulation of production processes, principles of digitization of production systems.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: 3_KMSR_AJ	Course name: Quantitative Methods in R System
Type, extent and method of instruction: Form of instruction: Lecture Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 20s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 1., 3.	
Level: III.	
Prerequisites:	
Course completion conditions: Practical exam - 100 points For a practical exam in the form of an assigned analysis, the student will receive a maximum of 100 points. By a practical exam, the student demonstrates the acquisition of knowledge provided in the course. To successfully complete the course in due time, the student needs to obtain at least 65 points of the overall evaluation. During the practical exam in the regular or corrective term, the student can use any available study materials, or can work with information from the Internet.	
Learning objectives: The student will be acquainted with the basics of the statistical program R, with its structure, syntax and its pre-programmed commands. After completing the course, the student will be able to perform a moderately demanding complete statistical analysis, which consists of data processing, data preparation, descriptive statistics and the estimation of supervised and unsupervised models. Furthermore, the student will be able to process the results of the analysis into a suitable form, possibly using graphic libraries.	
Brief outline of the course: Introduction to R, basic commands in R, preparing data, working with data, descriptive statistics and hypothesis testing, using graphical packages, principal components method, cluster analysis, prediction and classification models, cluster analysis of panel data, programming of own functions and loops in R

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_KMV_AJ	Course name: Quantitative Methods in Research
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 20s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2., 4.	
Level: III.	
Prerequisites:	
Course completion conditions: a) mid-term assessment: not applied. b) final assessment: a project in the form of a scientific article (100 points.) For both a first attempt and a resit, on the basis of expositied topics and in line with the outline of the course, the student shall elaborate a project containing a quantitative analysis focused upon a suitably chosen issue of corporate economics and management. The project will take form of a scientific article for an impact journal (with an IF \geq median IF in the journal's category) with all required components.	
Learning objectives: Having completed the course successfully, the student <ol style="list-style-type: none"> 1. is capable of using analytical methods suitable for solving theoretical problems of corporate economics and for applied research in corporate management, 2. is acquainted with possible applicability of the expositied methods to scientific problems and practical tasks even outside the sphere of corporate economics, 3. is capable of creative application of the acquired knowledge in his scientific work and in solving practical tasks, 4. is capable of interpreting results obtained within the scope of the issues of corporate management at hand, 5. is competent to appraise the benefits of the obtained outcome within a complex investigation of the problem of corporate economics at hand, 6. is competent to develop new quantitative procedures in addressing scientific problems and practical tasks through creative use of the acquired knowledge. 	
Brief outline of the course: The course provides an overview of basic quantitative methods applied in corporate management and in business research to explain and model phenomena of corporate economics. The exposition will go over the following outline of topics: Inventory control models. Linear programming models. Waiting lines and queing theory models. Monte Carlo methods and simulation. Markov analysis. Statistical quality control. Models of exploring structure in objects (cluster analysis). Models of exploring structure in attributes (principal component analysis, factor analysis)	

The outlined topics will be explicated in a research context oriented upon issues of corporate economics and management.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: The Faculty of Economics	
Code: EMP3_UP_AJ	Course name: Sustainable Business
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 20s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2., 4.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: Preparation and elaboration of a semester work (content focus in connection with the topic of the dissertation), ongoing consultations on the topic - 70 p. b) final assessment: Defence of the semester work and discussion within the colloquium - 30 p.	
Learning objectives: Student <ul style="list-style-type: none"> - Familiarizes with various concepts related to sustainability at the individual, organizational and societal level, with particular emphasis on sustainable and responsible business, can discuss these concepts and their development at the global, national, and local levels. - Gains a comprehensive overview of the economic, environmental, and social aspects of the sustainable business from a theoretical and practical point of view, focusing on current trends and challenges. - Acquires skills for research, strategy, influencing and implementing systemic changes to ensure sustainability in business. - Can identify and characterize different sustainable interests and business initiatives through examples from various sectors. - Designs and can implement sustainable activities in business practice. Based on a critical analysis, it prioritizes problems in the field of sustainable business, proposes appropriate procedures for their solution. Can formulate sustainable business goals and measure performance to achieve them with regard to the focus of the topic of the dissertation. - Increase his/her career potential - develop his/her skills as an effective leader and driver of change in promoting smart, sustainable and inclusive growth in the context of the 2030 long-term sustainable development strategy. 	
Brief outline of the course: Introduction to sustainability. Sustainable development and sustainable business. Consumption and overconsumption. Globalization and sustainability. New models of sustainable business. Economic, environmental, and social level of sustainability. Driving forces and barriers to sustainable business. Sustainability measurement.	

Responsibility in business - historical development, theories of social responsibility. Corporate Governance. Socially responsible investment. Stakeholder management. Management and communication of sustainability/responsibility strategy.

Sustainable consumption. Consumer behaviour and sustainable marketing. Sustainable product.

Circular economics - essence and principles. Driving forces and barriers to the implementation of CE principles.

Perspectives of sustainable and responsible business. Equality, diversity, and inclusion. Creating shared values. Socially responsible marketing. Work-life balance. Social and green investment. Civic engagement and development.
