| <b>Code:</b> 2d-adp-004  | <b>Course name:</b> State Exam Master's Thesis Defence |
| <b>Type, extent and method of instruction:</b><br><b>Form of instruction:</b><br><b>Course type:</b> A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses)<br><b>Recommended number of periods:</b><br><b>Method of study:</b> combined  |  |
| <b>Number of credits:</b> 20   |  |
| <b>Recommended semester/trimester:</b> 3., 4..   |  |
| <b>Level:</b> II.  |  |
| <b>Prerequisites:</b>  |  |
| <b>Course completion conditions:</b><br>The conditions for obtaining grades A to E or Fx take into account all components of the state examination, which will be awarded by the State Examination Committee, are updated and listed in the syllabi for the state examination.   |  |
| <b>b) final assessment:</b><br>Final evaluation: The state examination has two components:<br>(1) Thesis defence. The thesis supervisor and the thesis opponent write a review of the thesis and propose a grade. The State Examination Committee comprehensively evaluates the quality of the thesis on the basis of the reviews and the student's defence of the thesis.<br>(2) The State Examination includes a colloquium debate (Methodological Instructions for the State Examination, 2022). In the colloquium, the student responds to the formulated questions and topics in the form of a more broadly conceived problem related to the thesis, the solution of which requires the student's knowledge of the issue presented in the syllabi for the state examination. These are based on a disciplinary-didactic basis, on a social-scientific and pedagogical-psychological basis in relation to the psychodidactic context of education.   |  |
| <b>Learning objectives:</b><br>1. The student acquires deeper knowledge of the solved problem of the diploma thesis, the broader context of the subject and is able to understand the contexts of the solved problem, to formulate clear conclusions from the diploma thesis and clear recommendations for practice, to understand the interrelationships of knowledge from the individual university courses.<br>2. In accordance with the description of the field of study, the graduate of the master's study will demonstrate in the colloquial defence of the master's thesis, especially in the pedagogical-psychological and social-scientific part (the so-called common basis): (1) theoretical knowledge and (2) practical skills by presenting the possibility of didactic transformation of the thesis topic into the educational process in the selected target group of pupils on a concrete example of modelling the specified didactic variables in general psychodidactic contexts (in accordance with the content of the pedagogical-psychological courses completed during the studies).<br>3. The student uses relevant professional sources and identifies significant ideas for the context of the issue addressed, theoretical knowledge of the problem addressed in practical diagnostic and didactic applications, or in the methodology of its research, and the broader pedagogical, |  |

psychological and social contexts in explaining the problem addressed. The student uses and applies knowledge of bibliographic and citation standards.

4. The student is able to analyze the solved problem into logically and systematically separated and interrelated structural parts of the thesis, to conceive and verify didactic procedures and educational programs for solving the problem of the thesis, respectively, to design and implement its research and interpret its results. The student can critically handle the theoretical background of the solved problem, synthesize the contextual knowledge and use it in professional communication when arguing and defending own point of view on the solved problem.

5. The student will produce a consistent professional text of a theoretical-didactic or theoretical-research nature, which includes a creative treatment of relevant professional sources, original own ideas and proposals for solutions to the problem being treated.

**Brief outline of the course:**

1. Professional knowledge of the thesis topic, its international, social, broader pedagogical-psychological context.

2. Focus of the thesis topic in the field of teaching and pedagogical sciences, for the relevant level (ISCED 2, ISCED 3).

3. Didactic transformation of the selected theoretical knowledge of the given specialization.

4. Methodology of research of the addressed problem.

5. Integration of the knowledge of the individual disciplines of higher education and the broader context of the theoretical background of the subject, according to the syllabi for the state examination. Integration of educational theory and practice on the example of the problem solved in the thesis.

6. Professional communication and argumentation.

7. Work with literature, bibliographic and citation standards.

8. Presentation skills.
