Course Description

University: Matej Bel University in Banská Bystrica						
Faculty: Faculty of Arts						
Code: 3d-pvp-218		Course name: Book Compiling and Editing				
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined						
Number of credits: 5						
Recommended semester/trimester: 1., 2., 3., 4., 5., 6..						
Level: III.						
Prerequisites:						
Course completion conditions: Participation in book compiling and editing.						
Learning objectives: The student 1) learns about the work in an editorial team 2) learns about editing 3) learns about communication with publishers and printing companies.						
Brief outline of the course: Text editing. Pre-print text preparation.						
Recommended literature:						
Language of instruction: Slovak						
Notes:student time load: 150 h. Text editing: 120 h. Pre-print text preparation: 30 h.						
Course assessment The final number of assessed students: 1						
A	B	C	D	E	FX(0)	FX(1)

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Arts	
Code: 3d-trans-002	Course name: Current Trends in Translation Studies
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 10	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: Completion of a project addressing the selected topic and its presentation (colloquium, symposium, simulated conference) including a discussion. Maximum score: 100 p. The grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%). Credits are assigned to the student who acquires the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: The student acquires knowledge of up-to-date research in translation and interpreting studies in the interaction with other disciplines in a broad social context Upon completion of the course, the student has developed their ability to address advanced research problems and demonstrate originality. They can apply their relational-argumentation discursive competence and appropriate metacommunication tools. The student can select a suitable research subject as well as processing, hypothesis verification, diagnostic, and prognostic techniques. They can present their research effectively. The student follows the trends and application possibilities within the discipline.	
Brief outline of the course: Sociocultural coordinates of translational communication (habitat, capital, competence, distinction, cultural adaptation, etc.). The norms of translational communication. Translation memes. The Polysystem Theory. Ideology and translation (manipulation, power). The dimensions of identity in translational communication (micro/cosmopolitanism, global hybridisation, canon disintegration, future of diversity, negentropy). Postcolonial theories. Globalisation and translation (new geography of translation, translational policy communication, mediation, translational assimilation and accommodation regimes, centripetal and centrifugal globalisation). Feminist translation theories. Linguistic anthropology, psycholinguistics, pragmalinguistics and their postulates in translation studies. Rehumanisation tendencies in translation. The digital age in translation studies. Ecotranslation studies. Post-translation studies.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Arts	
Code: 3d-dkk-001	Course name: Doktorandské kolokvium
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1., 2., 3., 4..	
Level: III.	
Prerequisites:	
Course completion conditions: The student actively participates in the doctoral colloquium organised for the doctoral students at FA MBU – Doctoral Quodlibet (the student presents a paper, actively participates in the scholarly discussion, and writes a paper incorporating the comments received, which will be published in an edited collection). a) continuous assessment: Active participation in the doctoral colloquium – paper presentation, responding to the questions received, discussing other students’ presentations. b) final assessment: Publishing the scholarly text (study) in an edited collection (reviewed).	
Learning objectives: The student <ul style="list-style-type: none"> - can formulate the goals of their research - can present their research to a specialised audience (consisting of experts in different fields) in a comprehensible and attractive way - is prepared to participate in a specialised discussion and respond in a clear and matter-of-fact way - can incorporate the recommendations from the discussion in the creation of a comprehensive scholarly text. 	
Brief outline of the course: Formulation of the basic theses addressed in the DT. Presentation of a specialised subject matter in a comprehensive way to peers who specialise in different scholarly fields. Preparation of theses and their defence in terms of scholarly discussion. Processing the recommendations from the discussion and their incorporation into the author’s scholarly study. Publishing the scholarly study.	
Recommended literature: Per the supervisor’s instructions.	
Language of instruction: Slovak, English	
Notes: student time load: 150 hours, of which: - heuristics and research: 90 hours	

- presentation preparation: 20 hours - preparation of the paper for publication: 40 hours

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Arts	
Code: 3d-ajd-201	Course name: English in Scholarly Communication
Type, extent and method of instruction: Form of instruction: Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: The maximum total number of points obtained for the interim and final evaluation is 100. Credits will be awarded to a student who has obtained at least 65 out of 100 points for meeting the specified conditions. The student has the right to one correction term of the written test, which he must pass at least 65%. a) continuous assessment: During the semester, the student is expected to: 1. active participation in seminars: 0 - 30 points, 2. home preparation for the seminar part: 0 - 20 points. b) final assessment: Final written test: 0 - 50 points in total.	
Learning objectives: The language level required to complete the academic course is English at a level of at least B2 (and higher). The learning outcome will be level C1 and the student will be able to autonomously and actively at this level in academic English: - use key vocabulary and syntactic structures (eg passive verbs) of academic English used in scientific communication, - present their study and research background, i. research project, conference paper, lead a lecture / seminar, etc. using the appropriate terminological apparatus, - prepare an English abstract (journal / proceedings, monographs, dissertations and other qualifications, etc.), - prepare an English summary (summary), - understand the essence of demanding professional texts of longer scope at the C1 level on specific and abstract topics, - translate into English an academic or other professional related text or study from their research discipline.	
Brief outline of the course: Academic English as part of standard English. Specifics of academic English (key terms and structures). Necessity to work with the dictionary. Types of codifying Slovak and English dictionaries (mono- and bilingual dictionaries). Using google compiler and other critical thinking translation tools. Collocations with nouns, adjectives and verbs. How to refer to sources, data, statistics, etc. Research intentions and methods. Structure of the academic text. Abstract. Summary. Presentation preparation.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Arts	
Code: 3d-sfi-034	Course name: Ethics of science and scholarship
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The student must acquire at least 50% on all duties in the written in the continuous assessment. Students have the right to one resit of the written test and on resit of the final oral exam. The course assessment corresponds to the A-FX grading scale: A (100 – 94%), B (93 – 87%), C (86 – 80%), D (79 – 73%), E (72 – 65%). Credits are assigned to students who acquire a minimum of 65 points out of a possible 100. a) continuous assessment: Test: 0 - 50 points b) final assessment: final discussion-based exam: 0 - 50 points	
Learning objectives: Students will: 1. be able to identify the essence of moral problem in scholarship and specialised creation, 2. gain understanding of the basic ethical approaches used in scholarship. 3. be able to critically evaluate non-ethical practices in scholarship and creation, 4. put the acquired knowledge in scientific and research into practice, 5. become familiar with the authors and main opinion trends that influence the contemporary discourse in the area of ethics of scholarship.	
Brief outline of the course: Changes in the image of science and science as a system of knowledge and institution in postmodern; science and the place of ethics of science; the idea of technoscience and its criticism; challenging the idea of enlightenment - progress and legitimizing science; changes in the relationship between science and society and the problem of social responsibility. Morality as a normative system, contrary to legal norms. The structure of morality. Relevant ethical theories as a starting point for applied ethics (naturalism vs. antinaturalism in ethics, cognitivism vs. emotivism); ethics of virtues and deontological ethics, utilitarianism and its forms (consequentialism and rule utilitarianism, discourse ethics). Basic ethical dilemmas. Ethics as a philosophical discipline and applied ethics. Basic forms of applied ethics (bioethics, ethics of science and technology). Ethical implications of scientific research and their impact on individuals, humanity, society and nature. Responsibility for science, ethics and code of ethics for the scientific community. Institutionalization of the ethics of science (science, education, politics, public administration, business, etc.). Ethics of science as a search for an answer to the question: technical possibilities and their moral requirements - manifestations in medical ethics and bioethics). The relationship	

between applied ethics and rights. Etc. Institutions for science ethics and international ethical standards for science and research. Forms of moral misconduct in science. Responsibility of the scientist and responsibility in scientific work. The question of authorship as an ethical issue. Honest statements and thanks as ethical forms in science. Grant and team tasks as moral obligations. Rules for publication and scientific discourse. Plagiarism and self-plagiarism. Reviewing as an ethical tool. Responding to fraud in scientific work. Minimizing unethical practices. The importance of ethical regulators in scientific work. Ethics code and ethics committee in scientific and research communities. Situation in the field of the use of ethical tools in scientific institutions in Slovakia.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Arts	
Code: 3d-vek-001	Course name: Scientific Communication and Public Performing
Type, extent and method of instruction: Form of instruction: Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: critical reading and relational-argumentative evaluation of the relevant technical sources corresponding with the topic of the student's own dissertation thesis (40 points) b) final assessment: public presentation of the chosen motif and defence of the introduced concept in the colloquium (60 points) Maximum number of points covering a continual and final assessment is 100. Credits are assigned to the student who acquires a minimum of 65 points out of possible 100.	
Learning objectives: The student will be able: <ol style="list-style-type: none"> 1. To identify the conceptual-compositional essence, to know the purpose and is aware of the meaning of the academic communicates in the technical communication, 2. To understand the limits, depth relations and connections of the technical communication, 3. To understand the level of similarity and to distinguish the differences between the oral and written form of the technical text, 4. To respect the rules of the preparation and the rules of managing of the successful scientific dialogue, 5. To adequately correlate the theoretical-methodological bases, peculiarities of the subject of the scientific attention and in the correspondence with the scientific moral to politely present the acquired knowledge in the public environment at the required technical level, 6. To apply the acquired knowledge and experience in the scientific communication during the modelling of the project of the student's own dissertation thesis, 7. To effectively apply the critical skills in the technical communication in a way that the student's perception, thinking, reading oral and written communication were accurate, understandable and dynamically presented. 	
Brief outline of the course: Modern paradigms in the scientific communication sphere. Essence, function and goals of the scientific communication. Supporting trends and frequent genres of the scientific communication. Technical text as an idea, intention and architecture. Accurateness, persuasiveness and intelligibility: topic and its structuring. Technical text and critical contexts. Introducing	

of the technical text as a complex matter. Verbal element of the scientific communication- general characteristics and the so called neuralgic places. Non-verbal elements of the scientific communication- essence, cooperation and meaning. Argumentation in the scientific communication. Presentation and defence of the scientific opinions- synthesis of attempts, degree of professionalism and measure of the success.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Arts	
Code: 3d-trans-003	Course name: Theory of Interpreting and Transcultural Communication
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 10	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: Active participation in seminars and interactive tasks. Developing theoretical knowledge. Completing self-study assignments per instruction (e.g. completion of the seminar paper, paper creation and ppt presentation, preparation for a specialised discussion or colloquium, etc.). Passing the final exam. The maximum number of points consisting of continuous and final assessment is 100. The grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%). Credits are assigned to the student who acquires the minimum of 65 points out of the possible 100 for completing the given requirements. b) final assessment: Active participation in seminars and interactive tasks. Developing theoretical knowledge. Completing self-study assignments per instruction (e.g. completion of the seminar paper, paper creation and .ppt presentation, preparation for a specialised discussion or colloquium, etc.). Passing the final exam.	
Learning objectives: The student <ol style="list-style-type: none"> 1. can explain the place of the translation competence and transcultural communication within the system 2. follows the current development in the interpreting studies on the international level 3. gains inspiration and applies it in the research of interpreting processes and actions 4. applies the knowledge and skills acquired in practice, communication, and doctoral studies. 	
Brief outline of the course: Interpreting as a skill. Translation/interpreting studies as an interdisciplinary field. Monodisciplinarity, interdisciplinarity, transdisciplinary, transversality. Specific multicultural connectivity in transcultural communication. Intercultural and intracultural competence. Discursive inspiration in interpreting research, rational, empirical, ethical, and power determinants in oral translational communication. Cognitive research of interpreting strategies with the emphasis on neutralisation. Innovative and accurate interpretations of translational phenomena. Moving away from structuralist dichotomies, towards the subjectivisation of translation research. Defective/ marked texts. The ambivalence of authenticity in source texts. Hybridity and the multimedia nature of modern communication. The hybrid forms of translation – overlaps between orality and writing.
