University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Natural Sciences	
Code: 2d-dpo-005	Course name: State exam / Master's thesis defence
Type, extent and method of instruction: Form of instruction: Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 20	
Recommended semester/trimester: 3., 4..	
Level: II.	
Prerequisites:	
Course completion conditions: The state exam consists of two parts: (1) Diploma thesis (DT) defence. The diploma thesis supervisor and its reviewer create reviews and provide assessment. The State Examination Commission provides a complex evaluation of the DT's quality based on the reviews and student's thesis defence. (2) The state examination also includes a specialised discussion (Methodological Instruction on the State Examination, 2022). During the discussion, the student responds to questions addressing the broader context of their DT subject matter to prove they have the knowledge pertaining to the state examination topics. These topics address the subject didactics, basics of social sciences, pedagogy, and psychology in the psychodidactic context of education. The conditions for obtaining grades A to E take into account both parts of the state examination. They are specified in the current state examination topics.	
Learning objectives: 1. The student has advanced knowledge and understanding of the subject matter addressed in the Diploma thesis including its broader context. They can formulate clear conclusions and practical recommendations. The student has developed systematic knowledge of the individual disciplines addressed during their university study. 2. In accordance with the field of study description, the student is required to prove the following (especially in the core curriculum disciplines – pedagogical psychology and social sciences) knowledge and skills: 1) theoretical knowledge 2) practical skills and the ability to apply them in teaching the selected target group of students by providing a specific example of modelling the selected didactic variables in the general psychodidactic context (in accordance with the pedagogical and psychological disciplines that were part of the study). 3. In accordance with the field of study description, the student is required to prove the following: 1) theoretical knowledge 2) practical skills (in the scope of their DT) and the ability to apply them in teaching the selected target group of students by providing a specific example. 4. The student can identify relevant specialised sources as well as the ideas important for the context of their thesis. They have theoretical knowledge of the research topic in practical diagnostic and didactic contexts. They understand the research methodology, and the broader pedagogical, psychological, and social context of the problem. The student follows the bibliographic and citation standards.	

5. The student can analyse the subject matter and arrange it into logically and systematically separated and interconnected structural parts of the thesis, design and verify the didactic procedures applied to the subject matter addressed in their thesis, design and implement research, and interpret its results. They can use the theory critically, synthesize the contextual knowledge, and use it in specialised communication, i.e. argumentation and defence of their opinion on the subject matter.
6. The student creates a consistent specialised text (focused on theory/didactics or theory/research) in which they approach the relevant specialised sources in a critical manner and uses the relevant sources in a creative way. They can creatively process the relevant specialised sources, offer own original ideas and ways of addressing the subject matter.
