Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-APGNE	Course name: Actors and Processes of the Global and National Economy
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 2s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: elaboration and presentation of seminar paper: 40 points of the overall evaluation b) final assessment: final test: 60 points from the overall evaluation	
Learning objectives: Knowledge: The student knows the interdisciplinary nature of the global and national economy and can explain their basic concepts, phenomena, and categories. He masters methodological approaches to the study of various aspects of the subject of international economics, understands the thesis of economics as an intersection of sciences, and can define the main lines of its research on an international scale. He has methodological knowledge of key areas of macroeconomic knowledge as a basis for practice. He knows the key players in the national and global economy. Skills: The student can critically interpret the main directions of social science research in international economics. He presents macroeconomic views on the problems of its specialization, and formulates his own analytical and critical views based on theoretical, empirical knowledge, and logical arguments of the international economy. He can analyze economic and political processes in the global and national economy. Competences: The student can autonomously and effectively apply economic theory to the practice of international economic and political relations. He assesses the functioning of the economies of different countries in the world economy and evaluates the external environment and the factors that influence their decision-making. He knows and can properly apply the laws of development of the world economy with special regard to current developments.	
Brief outline of the course: 1. Characteristics of the world economy- the essence and subject. 2. International division of labor, internationalization, integration, and interdependence. 3. Development of the world economy after World War II. 4. Globalization and its manifestations. Global problems. Global economy. 5. Actors of the national and global economy. 6. The main economic cores in the world. 7. International, foreign, and world trade. Commodity and territorial structure of trade. 8. Mobility of production factors and their manifestations in the global economy.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-CCI4	Course name: Citation in the publication registered in citation indexes IV.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 3	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: Citation in domestic or foreign output of publishing activity registered in citation indices, registered in the database of publishing activity and responses of the University Library of the MBU: 100 %	
Learning objectives: The student is able to publish outputs achieving recognition in the form of their citation in domestic or foreign outputs of publishing activities registered in citation indices. At the same time, the student strengthens his / her competence to communicate with the academic community, improves his / her publishing habits, cultivates professional / scientific style and written expression, demonstrates the ability to disseminate research results effectively and proves to be a member of the scientific community.	
Brief outline of the course: Citation, forms and types of citations in scientific literature. Citation as part of scientometrics. Citation index. Open access and its opportunities to increase the citation rate of publications. Possibilities of increasing the readability and citation rate of publications (participation in domestic conferences, publishing in top-quality peer-reviewed scientific journals, use of social media, and professional networks/platforms for dissemination of publications). Active search for citations of own publications and possibilities of their monitoring and evaluation. Evidence of citations in the University Library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-SDVVP	Course name: Co-investigator of a domestic research project
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 5	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: participation in solving domestic research project and evaluation of assigned tasks arising from the set project objectives: 100 %	
Learning objectives: The student knows the specifics of the project and actively, responsibly and effectively solves various tasks arising from the project objectives. In finding the necessary solutions, he / she can make appropriate use of scientific approach methodology, as well as the acquired knowledge and skills. He/she is able to cooperate productively with other project researchers, thus improving his/her teamwork skills. In line with the objectives of the research / project, he/she produces relevant publications (himself/ herself or in co-authorship) demonstrating his/her ability to disseminate research results in an effective way. At the same time, he/she can strengthen and create domestic and foreign institutional partnerships.	
Brief outline of the course: The student participates in the solution of the project in cooperation with the project leader and members of the project team, with whom he implements specific research activities, including publication outputs	
Recommended literature: according to the nature of the researched issue	
Language of instruction: Slovak, English	
Notes:student time load: total: 150 hours, of which: project preparation and project documentation: 20 hours involvement in the solution of the project in the form of specific research and publication activities: 130 hours

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-ZŠP	Course name: Completion of a study stay abroad (at least 1 month)
Type, extent and method of instruction:	
Form of instruction:	
Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses)	
Recommended number of periods:	
Method of study: combined	
Number of credits: 10	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions:	
<p>The study stay abroad can be carried out for the purpose of study, research or summer schools. It takes place at an educational or research institution of own choice. The scope of the study stay abroad is at least 1 month. It can also be realized through e-mobility and within various mobility and scholarship programs (eg National Scholarship Program, Erasmus +, SAIA, CEEPUS, Austria-Slovakia Action, Fulbright, DAAD, Visegrad Fund, government scholarships resulting from bilateral intergovernmental cooperation agreements,...). The student contacts his / her supervisor electronically at least once every two weeks and briefly informs him/her about the course of the study stay.</p>	
a) continuous assessment:	
not implemented	
b) final assessment:	
<p>Passing a stay abroad in the range of min. 1 month, confirmation (certificate, evaluation report, etc.) of the receiving institution about the completion of the study stay, elaboration of the final report: 100 %</p>	
Learning objectives:	
<p>By completing a study stay abroad, the student learns about the system of scientific and pedagogical work at the visited workplace. He/she will gain new, expanding knowledge that he/she can synthesize and apply in the teaching process. He/she will acquire a broader knowledge of professional terminology in a foreign language and increase his/her potential in the field of scientific cooperation and the creation of publications with foreign partners. He/she will develop his/her professional, social, communication and presentation skills and strengthen his/her employability.</p>	
Brief outline of the course:	
According to the study stay plan.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-RKS	Course name: Decision-making in a Crisis Situation
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 2s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: Preparation and presentation of the project according to the chosen issue: 40 % (max. 40 - min. 26) b) final assessment: Oral alt. written exam in accordance with the content focus of the subject: 60 % (max. 60 - min. 39). Rating total: 100 % (60 + 40) The stated conditions of the assessment are valid for full-time and part-time study.	
Learning objectives: Knowledge: 1. The student masters the basic concepts and also has knowledge of current priorities in the field of decision-making in crisis situations, as well as knowledge of ongoing phenomena of socio-economic and socio-political system. 2. He is able to orientate himself in professional literature as well as in legislative instruments concerning crisis management. 3. He can identify and classify crisis phenomena (crisis, crisis situation), risks of crisis phenomena, decision-makers in crisis situations, etc. 4. He masters the individual sequences of creating crisis strategies - formulation, approval, implementation and evaluation. 5. Within the solution of crisis phenomena, he is able to perform an analysis of the problem, its structuring and precisely define the existing problem. 6. He is able to examine, evaluate and predict problem situations and their impact on political processes, possibly emergence of crisis situations. Skills: 1. The student is able to professionally apply the acquired theoretical knowledge about decision-making in a crisis situation in application practice. 2. He is able to critically evaluate current socio-political problems, on the basis of which he is able to formulate his own opinion and possible solutions. 3. Can apply interdisciplinary insights in decision-making in crisis situations, while applying the knowledge of other related scientific disciplines (Political Science, Law, Economics, Sociology, etc.). 4. He applies the acquired scientific methods in the search for new procedures for solving crisis situations, in the analysis of relevant details of crisis phenomena and their interdisciplinary links, on the basis of which he formulates new hypotheses, judgments and strategies. 5. Based on its findings, it articulates the possible risks of crisis events, their typology and impact on society in changing political, economic, social, security, media and cultural conditions in a globalizing environment. 6. Can communicate competently with the professional community and the general public, and present his findings in discussions at the national and international levels.	

Competences: 1. The student is ready to perform activities related to ensuring the fulfillment of the tasks of executive and legislative bodies in management and decision-making in the event of crisis situations. 2. He is able to professionally participate in the creation of legislative instruments regulating procedures in times of crisis. 3. He is able to articulate opinions and communicate with actors in decision-making processes, taking into account possible barriers and risks. 4. When implementing decisions into application practice, he can communicate appropriately and competently with the public, taking into account the ethical and socio-psychological dimension of crisis management.

Brief outline of the course:

1. Introduction to the issue
2. Definition and classification of crisis phenomena (crisis, crisis situation)
3. Crisis as a subject of interdisciplinary research and knowledge
4. Risks of crisis phenomena
5. Typologization of risks and their impacts on society
6. Management and decision-making in crisis situations
7. Legislative framework for decision-making in crisis situations
8. Actors in decision-making in crisis situations
9. Resolution of crisis phenomena – Problem Analysis, Problem Structuring, Problem Definition
10. Creation of crisis strategies
11. Information as a decisive factor in the process of solving crisis phenomena
12. Ethical and socio-psychological dimension of crisis resolution
13. Barriers and risks of decision-making in crisis situations

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-DPO	Course name: Dissertation Thesis
Type, extent and method of instruction: Form of instruction: Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 40	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: Defense of the dissertation at the commission for dissertation defenses: 100 %	
Learning objectives: Student will use the acquired knowledge and skills in determining the subject and object, goals and methodology of research in the dissertation. Student is able to apply the proposed methodology in the creation of the selection unit and in the collection of primary and secondary data. He / she is able to appropriately combine quantitative and qualitative methods of scientific research with regard to its subject and objectives. The doctoral student critically evaluates the achieved results and is able to make corrections at any stage of the research. Based on the obtained data, he / she will prepare a thesis in accordance with existing rules and in accordance with the principles of academic ethics and scientific integrity. It responds adequately to the comments of opponents and defends the thesis in the commission for the defense of dissertations.	
Brief outline of the course: Selection and determination of the dissertation topic. Selection and study of scientific literature. Determination of research working methods, defining the subject, goals, tasks and hypotheses of research. Operationalization and interpretation of the concepts. Verification and selection of data collection methodology. Data collection and evaluation. Logical procedure of generalization and critical evaluation of research results. Elaboration of the content of the dissertation. Creation of the text of the dissertation, continuous and final assessment of the dissertation. Insertion of the dissertation into the academic information system. Study of supervisor's and opponent's reviews. Preparation of author's abstract and electronic presentation. Defense of the dissertation at the commission for dissertation defenses.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-PŠVOČ1	Course name: Elaboration of a review for SSA I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 3	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: Elaboration of the opponent's assessment of the student's scientific and professional activity and its presentation in the evaluation committee: 100 %	
Learning objectives: The student knows the criteria for evaluating the SSA thesis. He/she knows the methodology of processing and evaluation of student theses and appropriately implements it in assessing the quality of the submitted SSA thesis. Based on the acquired knowledge, he/ she eruditely evaluates the individual attributes of the submitted SSA thesis. He/she can assess the degree of fulfillment of objectives, the use of scientific methods, formal editing, content and work with literature. He/she is professionally qualified to critically analyze the professional text and prepare a review of SSA thesis.	
Brief outline of the course: 1. Assessment of individual attributes of the submitted SSA thesis (evaluation of student motivation, set goals, choice of methodological apparatus, work with literature, thesis structure, content and formal level of thesis) 2. Elaboration of an opponent's review on the SSA thesis 3. Possible presentation of the review in the evaluation committee.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-PŠVOČ3	Course name: Elaboration of a review for SSA III.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 3	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: Elaboration of the opponent's assessment of the student's scientific and professional activity and its presentation in the evaluation committee: 100 %	
Learning objectives: The student knows the criteria for evaluating the SSA thesis. He/she knows the methodology of processing and evaluation of student theses and appropriately implements it in assessing the quality of the submitted SSA thesis. Based on the acquired knowledge, he/ she eruditely evaluates the individual attributes of the submitted SSA thesis. He/she can assess the degree of fulfillment of objectives, the use of scientific methods, formal editing, content and work with literature. He/she is professionally qualified to critically analyze the professional text and prepare a review of SSA thesis.	
Brief outline of the course: 1. Assessment of individual attributes of the submitted SSA thesis (evaluation of student motivation, set goals, choice of methodological apparatus, work with literature, thesis structure, content and formal level of thesis) 2. Elaboration of an opponent's review on the SSA thesis 3. Possible presentation of the review in the evaluation committee.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-ZEMV	Course name: Knowledge Economy and International Relations in the 21st Century
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 2s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: Elaboration of a final paper in the form of a scientific text in the range of 10 - 12 pages of the core text (text structure: introduction, core - division into three main chapters, introduction, evaluation of the current state of researched problems, perspectives and starting points for further research of the selected issue, possible application in the dissertation process; conclusion, list of bibliographic references, appendices): 40 points b) final assessment: Final exam: 60 points	
Learning objectives: The student will understand the basic theoretical and methodological basis associated with the concept of knowledge economy based on a comparison of selected approaches presented in the sources of domestic and foreign professional literature. The student understands and uses professional terminology in the process of processing professional texts (scientific outputs) and in professional discussion. The student correctly perceives and evaluates the processes of implementation of the concept of knowledge economy in the European Union and other selected actors in the world economy. On this basis, the student critically evaluates selected tools and mechanisms implemented in the process of creating a knowledge economy model at the national level and at the supranational level and is able to formulate proposals for possible improvements in functionality or more appropriate system interconnection of applied tools and measures. The student has a comprehensive framework of knowledge in the field of factors and determinants significantly affecting the current development of international economic relations and on this basis is able to make predictions of their future development.	
Brief outline of the course: 1. Knowledge society and knowledge economy - selected approaches to understanding and understanding basic concepts. 2. Education as a key tool for the transformation of social and economic structures into a model of knowledge society and economy. The importance of research, development and support of innovation as key factors of economic growth and development of knowledge-oriented economy.	

3. Models of implementation of selected aspects connected with the concept of knowledge economy on the example of selected actors of the world economy.
4. European Union - an example of applying the knowledge economy model in the specific conditions of this complex transnational economic complex.
5. Strategies and approaches implemented within the European integration area and their connection to the concept of knowledge economy.
6. The process of implementing the Europe 2020 strategy and its connection to the concept of the knowledge economy.
7. Objectives and determinants of the European Union's economic growth and development agenda until 2030 and 2050 in the context of the knowledge economy.
8. Innovation performance and innovation potential of the European Union current state and forecasts for the future.
9. Specific process of implementation of the knowledge economy model in the conditions of the Slovak Republic.
10. Evaluation of the current state of the level of transformation of the Slovak economy into a model of knowledge economy.
11. Innovation performance and innovation potential of the Slovak Republic and their comparison with the V4 countries.
12. Assessment of the degree and level of competitiveness of the European Union at regional and global level and its possible strengthening in connection with the creation of a functional model of the knowledge-oriented economy within its internal economic environment.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-MESV	Course name: Methodology of Social Science
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 2s Method of study: combined	
Number of credits: 9	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: professional text processing for partial exam: 50 % b) final assessment: oral exam in the form of a guided interview: 50 %	
Learning objectives: <p>Knowledge: The student of the course has extensive general knowledge at the level of evaluation and also has extensive knowledge of current development priorities of the field of study and society, which serve as a basis for their own research and development, as well as for creating new knowledge. The student of the course knows the most widespread general-philosophical methodological approaches and specific scientific methods typical for research in the field of social and political sciences. The student of the course is theoretically and methodologically prepared to perform an analysis of political, international, economic and other social problems and changes and to design mechanisms and tools for their solution and optimization.</p> <p>Skills: The student is able to identify problems and priorities of development of the field of study, formulate and evaluate new hypotheses and strategies for further research in relation to the further development of political science, on the basis of knowledge of the most widespread general-philosophical methodological approaches typical for research in social and political sciences and specific research methods, he/she can evaluate theories, concepts and innovations, applies their own findings resulting from theoretical analysis and scientific research of complex and interdisciplinary nature, creatively reflects, designs, verifies and implements new research and working practices. The student is able to evaluate and logically choose specific scientific methods of basic and applied research and conceptualization of a scientific problem in the field. He practically masters the chosen research methods and uses them in the search for new procedures, analysis of relevant details and important interdisciplinary links.</p> <p>Competences: Student is characterized by critical, independent and analytical thinking in changing conditions, he/she has the ability to present research and development results to the professional community in the Slovak Republic and abroad. He takes into account social, scientific and ethical aspects when formulating research intentions and interpreting research results. He can determine the focus of research and coordinate teams in the relevant field of science in academic institutions, research, respectively analytical organizations. He is able to perform educational (pedagogical),</p>	

scientific-research and edifying activities at the university, resp. in other scientific-research or analytical institutions, to participate as an author or co-author in the publication outputs of these institutions. He is ready for lectures, seminars and exercises from selected thematic areas of the study field, evaluate students, supervise and oppose final theses for the relevant degree of study, to create new study materials and aids, can provide excursions and professional student practice in terms of organization, methodology and content.

Brief outline of the course:

1. Science, method, scientific method
2. Social reality
3. Positivism
4. Structural functionalism
5. Idealism and materialism
6. Realism and anti-realism
7. Social anthropology
8. Naturalism, anti-naturalism, pluralism
9. Behavioralism and postbehavioralism
10. Hermeneutics
11. Theory of rational choice
12. Systems theory and synergetics
13. Inductionism and deductionism

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-PPR	Course name: Participation in Political Reality
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 2s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 1.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: presentation of a written work on a predetermined topic: 100 %	
Learning objectives: Knowledge: The student masters modern and postmodern theories of civic participation, remembers the crucial analytical categories and methodological procedures of scientific research of civic participation. The student knows the actors of decision-making processes and the forms and methods of civic participation in political decision-making. Skills: The student is able to identify the theoretical and methodological basis of scientific research of civic participation, he also finds connections between participation and the environment in which citizens participate in political decision-making. The student is able to identify the actors, mechanisms and ways of civic participation and he is also able to assess the effects of civic participation on the stability of the political system. Competences: The student of the course is ready to actively participate in the preparation, implementation and evaluation of scientific research tasks and projects focused on the research of political participation. The student is also able to work or lead research teams, but also to coordinate individual civic initiatives at different levels of political decision-making to increase participation in decision-making processes.	
Brief outline of the course: 1. Civic participation as an attribute of a modern democratic political system 2. Old and new actors of public policy. 3. Forms and mechanisms of civic participation 4. Citizens' participation in political decision-making processes in direct democracy 5. Possibilities of political public participation within the representative principle of governance 6. Participatory principle of governance and horizontal and vertical differentiation of participants in the political decision-making process 7. Popular voting as a phenomenon of direct democracy 8. Elections as a mechanism for implementing the representative principle of governance 9. Alternative forms of political participation in a participatory democracy	

10. Post-democratic challenge and civic participation
 11. Case studies - referendum (Switzerland, Liechtenstein, California)

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-ÚDP	Course name: Participation in another domestic project (educational, mobility, institutional)
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 3	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: participation in solving another domestic project and evaluation of assigned tasks arising from the set project objectives: 100%	
Learning objectives: The student knows the specifics of the project and actively, responsibly and effectively solves various tasks arising from the project objectives. In finding the necessary solutions, he/she is able to make appropriate use of the methodology of the scientific approach, as well as the acquired knowledge and skills. He/she is able to work productively with other project researchers, thus improving his/her teamwork skills. In line with the objectives of the research / project, he/she produces relevant publications (by himself/herself or in co-authorship) demonstrating his/her ability to disseminate research results in an effective way. At the same time, he /her can strengthen and create domestic and foreign institutional partnerships.	
Brief outline of the course: The student participates in the solution of the project in cooperation with the project leader and members of the project team, with whom he implements specific research activities, including publication outputs	
Recommended literature: according to the nature of the researched issue	
Language of instruction: Slovak, English	
Notes: student time load: total: 90 hours, of which: project preparation and project documentation: 15 hours involvement in the solution of the project in the form of specific research and publication activities: 75 hours

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-P1	Course name: Pedagogical output of publishing activity (P1) as a whole
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 28	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: creation of textbook with a range of min. 3 AH and its publication in printed or electronic form in Slovak or English in a domestic or foreign publishing house and registration of the published text in the database of publishing activities of the University Library of the MBU: 100%	
Learning objectives: The student uses the acquired knowledge and skills and on the basis of them creates a textbook published in printed or electronic form in a domestic or foreign publishing house. Publishing a textbook confirms his/her erudition, ability to didactically interpret current knowledge, improves his/her publishing habits, cultivates written expression and strengthens the skill of critical assessment, as well as the ability to publish outputs that meet the necessary content and formal standards and principles of academic ethics.	
Brief outline of the course: Selection of methodological apparatus. Data collection, analysis and evaluation. Study of relevant literature. Structure creation and text processing. Review procedure and text editing. Communication with the publisher. Textbook printing, its distribution and registration in the database of publishing activities of the University library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-PPMV	Course name: Postmodernist Paradigm in the Theory and Practice of International Relations
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 2s Method of study: combined	
Number of credits: 9	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: Elaboration of a seminar work in the form of a scientific text in the range of 10 - 12 pages of the core text (text structure: introduction, core - division into three main chapters, introduction, evaluation of the current state of researched problems, perspectives and starting points for further research of the selected issue, possible application in the dissertation process; conclusion, list of bibliographic references, appendices): 40 points b) final assessment: final exam: 60 points	
Learning objectives: The student understands the influence and position of the postmodernist paradigm in academic thinking about international relations, as well as the possibilities and its application in the practice of international relations. The student will get acquainted with the basic principles of theoretical thinking about international relations in the context of its shift and anchoring perceived through the prism of the application of postmodernist view of selected phenomena, processes, actors and structures of complex international relations. The student will get acquainted with the basic starting points and concepts associated with the postmodernist paradigm and their position in both academic and practical thinking about international relations. The student correctly understands the position of the paradigm in the theoretical thinking about international relations and at the same time can identify its possible limits and limitations in the context of clarifying the dynamics of current developments in international relations. The student is able to critically evaluate the researched approaches and concepts on this basis to indicate possible lines of necessary modification or new constitution of the researched theoretical approaches. The student correctly understands and evaluates the importance and role of scientific discourse in the process of forming new directions of thinking about international relations.	
Brief outline of the course: 1. Postmodernist paradigm and its possible application and use in the process of theoretical grasp and practical thinking about the processes of formation of international relations determined by the dynamics of current developments. 2. Postmodernist paradigm and new impulses in the field of research of international relations.	

3. The importance of scientific discourse and controversy for the process of correct understanding of problems and design of research issues in the field of international relations.
4. Selected theoretical directions and approaches and their connection with the postmodernist paradigm.
5. English school - approach to thinking about international relations in the level of finding the middle position between realism and idealism.
6. English school and the concept of international society, basic postulates, relevance in the field of research of international relations, criticism.
7. English school - comparison with selected approaches to international relations.
8. English school - possibilities and limits of application in the study of current issues in the development of international relations.
9. Feminism and postmodernist insight into the study of selected problems of international relations.
10. Constructivism - basic starting points and application in the context of theoretical understanding of international relations.
11. Constructivism - possibilities and limits of application in the study of current issues of development of international relations I.
12. Constructivism - possibilities and limits of application in the study of current issues of development of international relations II.
13. Final summary.

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-MVK1	Course name: Presentation at an international scientific conference I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 5	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: Active presentation at an international scientific conference confirmed by inclusion in the official agenda/programme of the conference: 100 %	
Learning objectives: The student knows the principles of successful professional presentation and actively applies them in presentations at an international scientific conference. Competently and actively presents the results of the research (optimally in a foreign language). He/she has highly developed communication skills and argumentation skills. He /she can communicate and discuss with the academic community at an adequate level. He/she is able to defend his/her views in front of a professional audience. During the presentation, he / she can demonstrate professional erudition and deep orientation in the issue based on the acquired knowledge, and proves that he/she is a member of the domestic / foreign scientific community. He /she can create a scientific article for publication.	
Brief outline of the course: Defining the object and subject of a scientific contribution. Study of professional literature and its critical analysis. Data collection. Determination and verification of methodology. Wording of paper. Creating an electronic presentation. Conference administration. Inclusion in the program. Active speech. Discussion. Dissemination of experience from speaking at the conference.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-MVK3	Course name: Presentation at an international scientific conference III.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 5	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: Active presentation at an international scientific conference confirmed by inclusion in the official agenda/programme of the conference: 100 %	
Learning objectives: The student knows the principles of successful professional presentation and actively applies them in presentations at an international scientific conference. Competently and actively presents the results of the research (optimally in a foreign language). He/she has highly developed communication skills and argumentation skills. He /she can communicate and discuss with the academic community at an adequate level. He/she is able to defend his/her views in front of a professional audience. During the presentation, he / she can demonstrate professional erudition and deep orientation in the issue based on the acquired knowledge, and proves that he/she is a member of the domestic / foreign scientific community. He /she can create a scientific article for publication.	
Brief outline of the course: Defining the object and subject of a scientific contribution. Study of professional literature and its critical analysis. Data collection. Determination and verification of methodology. Wording of paper. Creating an electronic presentation. Conference administration. Inclusion in the program. Active speech. Discussion. Dissemination of experience from speaking at the conference.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-V1	Course name: Scientific output of publishing activities (V1) as a whole (monograph)
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 30	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: creation of a scientific publication (monograph) with a range of min. 3 AH and its publication in printed or electronic form in Slovak or English in a domestic or foreign publishing house and evidence of the published publication in the database of publishing activities of the University library of the MBU: 100 %	
Learning objectives: The student uses the acquired knowledge and skills and on the basis of them will create a scientific publication (monograph) published in printed or electronic form in a domestic or foreign publisher, providing a comprehensive, systematic analysis of one topic, scientific issue or part of the scientific field. Publishing the publication confirms his/her high professional qualifications, demonstrates the ability to disseminate research results effectively, improves his/her publishing habits, cultivates professional / scientific style and written expression, strengthens the competence to communicate with the academic community, as well as the ability to publish outputs at recognized level and proves to be a member of the scientific community.	
Brief outline of the course: Identifying a problematic scientific situation. Determination of the object / subject of research. Selection and verification of methodological apparatus. Data collection, analysis and evaluation. Study of relevant literature. Structure creation and text processing. Review procedure and text editing. Communication with the publisher. Monograph printing, its distribution and registration in the database of publishing activities of the University library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-V2DAT1	Course name: Scientific output of publishing activity (V2) as a part of an edited book or book of proceedings (chapter/paper) registered in WoS or SCOPUS I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 15	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: publication of scientific output (paper/chapter) in a book publication (peer-reviewed proceedings/scientific monograph) registered in the WoS or SCOPUS database and his/her evidence in the database of publishing activities of the University Library of the MBU: 100 %	
Learning objectives: The student uses the acquired knowledge and skills and on the basis of them processes the partial results of research activities in the form of scientific output (article / chapter), which he/she publishes in domestic or foreign book publication (book of proceedings/ monograph) registered in WoS or SCOPUS. Publishing the article/chapter confirms his/her erudition, demonstrates his/her ability to disseminate research results effectively, improves his/her publishing habits, cultivates professional / scientific style and written expression, strengthens the competence to communicate with the academic community, as well as the ability to publish scientific output at an internationally recognized level and proves to be a member of the scientific community.	
Brief outline of the course: Data collection, analysis and evaluation. Study of relevant literature. Selection and verification of scientific methodology. Creation of the structure and text processing (introduction to the issue, the state of elaboration of the researched issue, goal, clarification of the choice of methods, conclusions and solutions, list of bibliographic references) Administration of text publishing and review proceedings. Scientific output evidence in the database of publishing activities of the University Library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-V3DAT1	Course name: Scientific output of publishing activity in journal (V3) registered in WoS or SCOPUS I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 20	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: publication of the article in a scientific journal registered in the WoS or SCOPUS database and its registration in the database of publishing activities of the University Library of the MBU: 100 %	
Learning objectives: The student uses the acquired knowledge and skills and on the basis of them processes the partial results of research activities into a scientific output (article), which he/she publishes in a domestic or foreign scientific journal registered in WoS or SCOPUS. Publishing the article confirms his/her erudition, demonstrates his/her ability to disseminate research results effectively, improves his/her publishing habits, cultivates professional / scientific style and written expression, strengthens the competence to communicate with the academic community, as well as the ability to publish articles at an internationally recognized level and proves to be a member of the scientific community.	
Brief outline of the course: Data collection, analysis and evaluation. Study of relevant professional literature. Selection and verification of scientific methodology. Creation of the article structure and text processing (introduction to the issue, the state of elaboration of the researched issue, goal, clarification of the choice of methods, conclusions and solutions, list of bibliographic references) Administration of text publishing and review proceedings. Evidence of an article in the database of publishing activities of the University Library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-OKAJPOL	Course name: Specialized Communication in English
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 26 Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: specialized text translation: 0 - 30 points b) final assessment: final specialized discussion: 0 - 60 points	
Learning objectives: After completing the course, the student has deep terminological knowledge, a broad overview of individual cultures and sufficient respect for diversity to be able to naturally respond to various communication situations to which he will be exposed. The result of such a comprehensive training is a student who understands and respects the differences and specifics of other cultures, able to adequately act and communicate effectively in a multilingual and incultural environment. The student has the knowledge, skills and abilities that will provide him with an adequate basis for further development in practice, with regard to his future work in a multicultural environment. The student actively uses the acquired specialized and language knowledge and skills in preparation for the final academic discussion, which represents the culmination of academic education in the field of specialized language. After graduation, the student is able to communicate at a high professional level in oral and written form using an adequate methodological apparatus.	
Brief outline of the course: 1. Defining the content and terminological framework of the study field and the focus of the dissertation thesis in English. 2. Study of available relevant literature. 3. Presentation of the conclusions of the first stage of the research of the dissertation thesis in English. 4. Preparation of specialized translation in connection with the field of study and the topic of the dissertation thesis. 5. Preparation of materials for a broad academic discussion in connection with the field of study and the topic of the dissertation thesis.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-O2DAT2	Course name: Specialized output of publishing activity (O2) as a part of a book publication or book of proceedings (chapter/paper) registered in WoS or SCOPUS II.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 13	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: publication of a paper in a peer-reviewed collection registered in the WoS or SCOPUS database or a chapter in a monograph registered in the WoS or SCOPUS database and his/her registration in the database of publishing activities of the University Library of the MBU: 100 %	
Learning objectives: The student uses the acquired knowledge and skills and on the basis of them processes the partial results of research activities in the form of professional output (article / chapter), which he/she publishes in domestic or foreign book publication (book of proceedings / monograph) registered in WoS or SCOPUS. Publishing the output confirms his/her erudition, demonstrates the ability to disseminate research results effectively, improves his/her publishing habits, cultivates professional style and written expression, strengthens the competence to communicate with the academic community, as well as the ability to publish outputs at an internationally recognized level and proves to be a member of the scientific community.	
Brief outline of the course: Data collection, analysis and evaluation. Study of relevant professional literature. Selection and verification of scientific methodology. Creation of the structure and text processing (introduction to the issue, the state of elaboration of the researched issue, goal, clarification of the choice of methods, conclusions and solutions, list of bibliographic references) Administration of text publishing and review proceedings. Output evidence in the database of publishing activities of the University Library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-O3DAT2	Course name: Specialized output of publishing activity in journal (O3) registered in WoS or SCOPUS II.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 18	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: publication of the article in a journal registered in the WoS or SCOPUS database and its registration in the database of publishing activities of the University Library of the MBU: 100 %	
Learning objectives: The student uses the acquired knowledge and skills and on the basis of them processes the partial results of the research activity into a specialized output (article), which he/she publishes in a domestic or foreign professional journal registered in WoS or SCOPUS. By publishing the article, he/she confirms his/her professional erudition, demonstrates the ability to disseminate research results effectively, improves his/her publishing habits, cultivates professional style and written expression, strengthens the competence to communicate with the academic community, as well as the ability to publish articles at an internationally recognized level and proves to be a member of the domestic / foreign scientific community.	
Brief outline of the course: Data collection, analysis and evaluation. Study of relevant professional literature. Selection and verification of scientific methodology. Creation of the article structure and text processing (introduction to the issue, the state of elaboration of the researched issue, goal, clarification of the choice of methods, conclusions and solutions, list of bibliographic references) Administration of text publishing and review proceedings. Evidence of an article in the database of publishing activities of the University Library of the MBU.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-OR1	Course name: Specialized review I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 5	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: publication of a book review in the scientific / specialized journal: 100 %	
Learning objectives: The student gets acquainted with new discourses and information, through which he/she expands his/her knowledge and deepens his/her expertise. He/she orients in the construction of interpretive text. He/she knows the procedures associated with the creation of professional reviews. He/she knows its content and formal specifics. He/she knows the characteristic features of descriptive, interpretive and reasoning stylistic procedure. He/she actively uses these procedures to create review text. By writing and publishing a review, the student confirms the ability to present their opinion, the ability to interpret current knowledge (interpretive competence), improves publishing habits, cultivates written expression and strengthens the skill of critical assessment, argumentation, as well as the ability to publish outputs that meet the necessary requirements.	
Brief outline of the course: Search for new scientific or professional book publications. Study of a scientific / professional book. Making notes and preparing materials. Review text creation. Publication of the review.	
Recommended literature: 1. ŠANDEROVÁ, J.: Jak číst a psát odborný text ve společenských vědách. Praha: SLON, 2007 2. SEGERT, S.: Jak recenzovat knihy. In Příloha k teologické reflexi, 2/1995. Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-ŠVOČ1	Course name: Supervision of SSA I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 5	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: processing of the supervisor's report ŠVOČ: 100 %	
Learning objectives: The student knows the methodological, formal and content requirements of SSA thesis. He /she can: design or modify the structure of the SSA thesis, identify the scientific / professional resources, assess the degree of fulfillment of objectives, selection and use of scientific methods, assess compliance with the formal and content requirements of the SSA thesis. Based on the acquired knowledge and skills, he / she is able to independently, responsibly and creatively lead the student in the process of processing the selected topic into the form of SSA thesis in accordance with the principles of academic ethics and scientific integrity.	
Brief outline of the course: Determining the research question and determining the content focus of the SSA thesis. Consultations with the student (selection of a suitable methodological apparatus, analysis of the state of elaboration of the issue in references of domestic and foreign literature, compilation of a preliminary list of initial scientific / professional references, compilation of the thesis structure, continuous control of thesis results) Final control of SSA thesis and assessment of compliance with the required requirements. Elaboration of review of SSA thesis and its possible presentation in the evaluation committee.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-ŠVOČ3	Course name: Supervision of SSA III.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 5	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: processing of the supervisor's report ŠVOČ: 100 %	
Learning objectives: The student knows the methodological, formal and content requirements of SSA thesis. He /she can: design or modify the structure of the SSA thesis, identify the scientific / professional resources, assess the degree of fulfillment of objectives, selection and use of scientific methods, assess compliance with the formal and content requirements of the SSA thesis. Based on the acquired knowledge and skills, he / she is able to independently, responsibly and creatively lead the student in the process of processing the selected topic into the form of SSA thesis in accordance with the principles of academic ethics and scientific integrity.	
Brief outline of the course: Determining the research question and determining the content focus of the SSA thesis. Consultations with the student (selection of a suitable methodological apparatus, analysis of the state of elaboration of the issue in references of domestic and foreign literature, compilation of a preliminary list of initial scientific / professional references, compilation of the thesis structure, continuous control of thesis results) Final control of SSA thesis and assessment of compliance with the required requirements. Elaboration of review of SSA thesis and its possible presentation in the evaluation committee.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Political Science and International Relations	
Code: 3-TEMU	Course name: Theories of Multiculturalism
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 0 / 2s Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: a) continuous assessment: not implemented b) final assessment: verbal examination: 100 % (100 points)	
Learning objectives: <p>Knowledge: The student of the study subject has a systematic, complex and comprehensive set of knowledge, which he / she can use due to his / her specialization also including interdisciplinary connection in the field of social sciences and humanities. He has adequate knowledge of theories, methodological procedures and is able to formulate research tasks and their solutions, which he uses in a sophisticated way in scientific projects and research, in the discursive framework of scientific conferences at a level corresponding to international criteria, as well as in social practice.</p> <p>Skills: The student is able to actively acquire new information, critically analyzes the transformational changes in global society and conflicts arising as a result of multicultural movements. He is able to characterize the normative perspective of current political cosmopolitanism and universalist conceptions of humanity and pluralistic communities. In this context, the graduate learns about differentiated forms of citizenship and current theories of world citizenship, which can compare and place in an empirical context. He can re-evaluate and use the argumentative framework of knowledge from the scientific fields of political science and in an interdisciplinary framework he can use them thoroughly and creatively in verbal theoretical and practical applications for the development of the field. Heuristically knows how to improve research issues, while being able to successfully participate and manage research tasks and teams in the innovation direction and support of science.</p> <p>Competences: The student with his autonomous and initiative approach can formulate scientific goals, procedures and methodology in solving new project requirements, participates in refining the results of the scientific field by taking into account long-term impacts in the perspective context of professional activity. He is ready to formulate the conclusions of research activities and demonstrates the ability of erudite scientific domestic and international cooperation.</p>	
Brief outline of the course: Multiculturalism and theoretical models. Antipluralistic multiculturalism.	

<p>"Open society" and tolerance. What is cultural identity. Recognition policy and positive freedom. Multiculturalism and democracy. Kant's idea of world citizenship. Cosmopolitan social theory and global power. Development of political cosmopolitanism. Critique of methodological nationalism. Political cosmopolitanism and freedom.</p>
