Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-TP-KVMVDV1	Course name: Chapters in scientific monographs published in domestic publishing houses I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 10	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Preparation and publication of a chapter in a scientific monograph published by a domestic publishing house. The registration of the subject output in the University Library of the MBU is a condition for completing the course.	
Learning objectives: By publishing a chapter in a scientific monograph published by a domestic publishing house, the PhD student demonstrates the ability to contribute fundamental knowledge or theoretical background based on his/her own research to date; demonstrates acquired skills in the preparation of a chapter in a scientific monograph; achieves competence to communicate with the academic community and to disseminate research results; demonstrates that he/she has become a member of the domestic scientific community.	
Brief outline of the course: A chapter in a scientific monograph means a chapter in a scientific monograph where the authors are listed in the table of contents or by the title of the chapter, and where the chapter in question is reviewed by at least two experts whose names are listed in the publication prior to publication. A chapter in a scientific monograph shall have a length of at least 1 author sheet, a print run of at least 100 copies, the relevant publisher's details, ISBN or ISSN.	
Recommended literature: specialist literature according to the focus of the chapter in the scientific monograph	
Language of instruction: slovak language, foreign language of the student's choice	
Notes:student time load: 300 hours	
Course assessment The final number of assessed students: 0	
abs	n
0.0	0.0

Instructor:
Last changed: 03.06.2022
Approved by: prof. JUDr. Jaroslav Klátik, PhD.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-TAKS	Course name: Criminal Aspects of Criminal Intelligence
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final assessment is carried out in the form of a seminar paper, the topic of which is determined by the student's teacher with a focus on the topic of the student's dissertation and the subsequent oral presentation of the seminar paper.	
Learning objectives: Graduates will acquire the necessary knowledge of the meaning and purpose of criminal intelligence carried out by the security forces of the Slovak Republic and its criminal law aspects. With an emphasis on the use of the information obtained in the individual stages of criminal proceedings, especially in the process of evidence. Students will be familiarized with the legal regulation of the activities of the security forces, the powers and duties of the officers as well as the means. They will be able to use the acquired knowledge in scientific research and knowledge of purposeful processes of criminal proceedings as well as in further practical activities in the field of law.	
Brief outline of the course: The concept of criminal intelligence, its place, role and relationship to criminal proceedings. Structure of the security forces of the Slovak Republic, their powers and means, operative-search activity, intelligence activity. Security forces of the Slovak Republic - legal regulation, sources of information usable in criminal proceedings and means of obtaining it, analysis. The position and role of the security forces in the fight against current security challenges. Instruments of international cooperation of security forces. Control of security forces. Basic directions of use of information of security forces in criminal proceedings. Legal conditions for the use of intelligence information in evidence. The importance of intelligence information for evidence.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-TPEÚ	Course name: Criminal Law of the European Union
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final evaluation consists of 2 parts, each with equal weighting, i.e. 50%: 1. the preparation of a seminar paper, the topic of which is determined by the student's teacher with a focus on the student's dissertation topic, and 2. oral examination.	
Learning objectives: After completing the course, the student is able to assess and apply the knowledge acquired through studies in the field of European Union criminal law to a scientific problem, which forms the subject of the dissertation. He/she is able to apply, evaluate and de lege ferenda develop legal proposals to solve those problems that are essential for its effectiveness and rationality in criminal proceedings.	
Brief outline of the course: Criminal law of the European Union is a subject of doctoral studies, in which the teacher develops an interpretation of the impact of the law of the European Union on the national criminal law of each Member State of the European Union, including the Slovak Republic. This perceived link concerns both the legislation and the case-law of the Court of Justice of the European Union. The issue of the impact of European Union law on criminal law is currently considered to be the most dynamically developing area of this autonomous law in the international context. The teaching of this subject builds on the courses already taught on substantive criminal law and criminal procedural law and, last but not least, on the courses devoted to European law. The thematic content of the course is focused on the following topics: 1. The definition of European Union criminal law and its relationship to national criminal law 2. Sources of European Union criminal law 3. Criminal liability, jurisdiction and exchange of information from criminal records of European States 4. European criminal offences	

5. Procedural rights in criminal proceedings 6. Cooperation in criminal matters within the European Union 7. Mutual recognition of judicial decisions in criminal matters in the European Union 8. Cooperation in criminal matters within the Schengen area 9. Cooperation in criminal matters with non-member States of the European Union 10. Protection of victims of crime 11. Europol, Eurojust, OLAF 12. Judicial cooperation networks in criminal matters

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-KFD	Course name: Criminalistics and Forensic Sciences
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final evaluation consists of 2 parts, each with equal weighting, i.e. 50%: 1. the preparation of a seminar paper, the topic of which is determined by the student's teacher with a focus on the student's dissertation topic, and 2. oral examination.	
Learning objectives: After completing the course, the student of doctoral studies in criminal law is able to assess and apply the knowledge acquired through the study of trends in criminalistic technique, criminalistic tactics and the use of the potential of forensic disciplines in relation to the knowledge of the basics of criminalistics in previous university studies. Special attention is paid to the study of detection and criminal aspects of economic crime, information security and cybercrime in the digital space. The acquired knowledge will enable the graduate to deal more effectively with issues related to criminal law and its application in legal practice.	
Brief outline of the course: Criminalistics and Forensic Disciplines is a subject of doctoral studies, in which the lecturer develops an interpretation of the complex perception of trends in criminalistic technique, criminalistic tactics and the use of forensic disciplines in the process of detection and clarification of criminally relevant events and the search for and securing of criminalistic clues, with motivation for scientific work and the exploration of techniques and tactics in the detection of selected types of crime. The study of selected topics is also provided with the support of the National Criminal Agency and the Institute of Criminalistics and Expertise of the Slovak Police, national and foreign expert data base and experience in the above-mentioned issues. The thematic teaching will be devoted to the following topics: 1. Trends in the theory of criminalistics and their application to criminally relevant events and situations.	

2. Trends in criminalistic tactics and techniques.
3. Trends in the development of forensic disciplines I.
4. Trends in the development of forensic disciplines II.
5. Trends of criminalistic work and expert work within the National Criminal Agency and the Institute of Criminalistics and Expertise of the Police Force of the Slovak Republic.
6. Criminalistic tactics and techniques in property crime detection.
7. Criminalistic tactics and techniques in the detection of violent crime.
8. Criminalistic tactics and techniques in the detection of vice crime.
9. Criminalistic tactics and techniques in the detection of economic crime with emphasis on the detection of corruption.
10. Criminal aspects in the field of information security.
11. Computer crime in the digital space.
12. Legal regulation of expert activity, its interpretation and development.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-ETS	Course name: Electronisation of Criminal Judiciary System
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final evaluation consists of 2 parts, each with equal weighting, i.e. 50%: 1. the preparation of a seminar paper, the topic of which is determined by the student's teacher with a focus on the student's dissertation topic, and 2. oral examination.	
Learning objectives: After completing the course, the PhD student is able to assess and apply the knowledge acquired through studies in the field of computerisation of criminal justice. The student will be familiar with the use of e-services in the Slovak judiciary, the electronicisation of the judiciary and will also be able to focus on the possible use of these services in criminal law. The student will be able to work seamlessly with the electronic collection of laws (SLOV-LEX), and will be familiar with the issue of electronic services for monitoring of accused and convicted persons (ESMO). After completing the course, the student will understand that the basic architecture of the modernization of the electronic equipment of the judiciary consists of projects that are implemented with leading suppliers in the field of information technology, who are already implementing several projects, such as the implementation of the electronic court file (funded by the Swiss mechanism) or the electronic Collection of Laws - Slov-Lex, which is funded by the EU funds. It will also know how to use electronic services while maintaining the protection of personal data.	
Brief outline of the course: The main objective of the course is to learn about the development of existing and the introduction of new electronic criminal justice services, taking into account the development of integration interfaces between the Ministry of Justice, criminal courts and the Central Portal of Public Administration, a universal secure and trustworthy repository ("archive of justice"), electronic court files, securing decisions by technical means - ESMO, technical infrastructure for video conferences, video and audio transmission equipment for main hearings, use of e-services in the criminal justice	

system, sending documents by electronic mail, filing by electronic mail through an electronic mailbox. Also, the subject matter of this course is to know in detail the specific laws related to the computerization of the criminal justice system. The thematic content of the course focuses on the following topics:

1. The electronicisation of criminal court services currently conducted in conventional (paper) form.
2. The legislative process enabling the implementation of electronic services in criminal justice.
3. Use of e-services in criminal law.
4. Introduction of new e-services in criminal justice and building new information systems.
5. Electronicisation of criminal court services.
6. European e-Justice Portal.
7. Control of the enforcement of decisions by technical means in criminal and civil law.
8. Electronic monitoring of accused and convicted persons, preliminary investigation by probation and mediation officers, prevention of operational and security incidents.
9. Use of electronic bracelets by convicts abroad.
10. Protection of personal data by computerization of criminal justice.
11. Protected navigation services. The European Galileo satellite navigation system.
12. Implementation of the electronic court file. Use of electronic mail in criminal proceedings.
13. Cybercrime. Use of information-technical means and means of operational-search activities in securing information.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-MJSTV	Course name: International Judicial Cooperation in Criminal Matters
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 3.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final evaluation consists of 2 parts, each with equal weighting, i.e. 50%: 1. the preparation of a seminar paper, the topic of which is determined by the student's teacher with a focus on the student's dissertation topic, and 2. oral examination.	
Learning objectives: After completing the course, the student is able to assess and apply the knowledge acquired through studies in the field of international judicial cooperation to a scientific problem that forms the subject of the dissertation. He/she is able to apply, evaluate and de lege ferenda develop legal proposals for solving those problems in the field of legal relations with foreign countries and international judicial cooperation which are essential for its effectiveness and rationality in criminal proceedings.	
Brief outline of the course: International Judicial Cooperation in Criminal Matters is a doctoral subject in which the lecturer provides an explanation of not only the cooperation in criminal matters between EU countries, the Lisbon Treaty, the theoretical and practical aspects of legal relations with foreign countries, but also of Eurojust, which will provide a detailed view of the current form of this European institution and the possibilities of its future development in the light of the Lisbon Treaty, and at the same time the lecturer will outline an explanation of the possible future establishment of the European Public Prosecutor's Office. In this case, the cooperation is exclusively between EU Member States in the criminal field, involving legal instruments of international cooperation in criminal matters that have been created both within the European Union and between Member States originally outside that framework, such as the Schengen Agreements or other legal instruments that pre-date the establishment of the EU. The following topics will be covered thematically: 1. Judicial cooperation in criminal matters and its development in a historical context 2. Horizontal judicial cooperation - mutual legal assistance between two sovereign states	

3. Vertical judicial cooperation - legal assistance is provided by a state or an international organisation to an international criminal court or tribunal 4. Lisbon Treaty and its impact on further judicial cooperation in criminal matters 5. The status and activities of Eurojust 6. Extradition 7. The principle of speciality in judicial cooperation in criminal matters 8. Extradition and pre-trial detention 9. Enforcement of decisions in relation to a decision of a court of another State 10. Legal aid in relation to a foreign country 11. Schengen criminal area 12. Bodies of the European Union active in the field of international judicial cooperation

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-MetPV	Course name: Legal Science Methodology
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: Final examination in oral or written form.	
Learning objectives: Knowledge and understanding: The student will gain knowledge of the latest trends in legal methodology. Practical skills: The student will apply the latest knowledge regarding views on the concept of law in the methodology of law. The student will analyse and then be able to apply the latest knowledge concerning the interpretation of law in legal practice. This knowledge develops the student's critical thinking skills. Based on this knowledge, the student is able to analyze the impact of legal principles on positive law, the conflict of legal principles with each other, and legal principles and fundamental rights using the so-called judicial tests. As a result of the knowledge and skills acquired, the student is able to analyze the jurisprudence of the courts. Competencies: The student is able to use this knowledge in the development of the dissertation and in the application practice.	
Brief outline of the course: The genesis of the development of the concept of law in legal thinking, the aspect of purpose and meaning in the interpretation of law, principles in legal thinking, the conflict of legal norms and its resolution, analogy in law, legal ethics and its place in reentrant law, legal logic.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-MVPaEVP1	Course name: Methodology of Scientific Knowledge and the Ethics of Scientific Work I.
Type, extent and method of instruction: Form of instruction: Lecture Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 1.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: Final examination in oral or written form.	
Learning objectives: Knowledge and understanding: The student will acquire knowledge of contemporary philosophical-methodological approaches to scientific knowledge. The student is capable of creative analytical thinking in the form of developing his/her own or improving existing attempts to solve problems of scientific research. Practical Skills: The student is able to analyze and identify basic methodological practices in the legal and social sciences. The student is able to critically review given solutions to set research questions and work scientifically. Competencies: Through the acquired knowledge, the student applies an independent creative and critical approach through relevant arguments to the basic problems and theories of legal sciences presented in the dissertation.	
Brief outline of the course: The fragmentation of social knowledge and the status of social sciences and rights. The unity of the social sciences and its foundations. Typology of philosophy of social and scientific knowledge. Characteristics of changes and their results. Methodology of scientific work. Written work for the dissertation examination. Methodology of writing a dissertation; definition of the object and subject of investigation; aim and formulation of hypotheses. Material, determination of the sample, methods of data collection and processing. Methods of scientific research - empirical methods, intuitive and expert methods, theoretical methods. Mathematical and statistical methods of data processing. Ethics of scientific work; technical rules of scientific work (work with source materials,	

testimonial ability of the work), ethical rules of scientific work (honesty, modesty, discussion, polemics, criticism), plagiarism. Formalization of the text.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-MVPaEVP2	Course name: Methodology of Scientific Knowledge and the Ethics of Scientific Work II.
Type, extent and method of instruction: Form of instruction: Lecture Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: Final examination in oral or written form.	
Learning objectives: Knowledge and understanding: The student is able to identify recent trends and issues in social science methodology. Practical Skills: The student is able to analyze the status and nature of the social sciences. On the basis of the knowledge acquired, the student is able to critically analyse the interconnection of the network of philosophical categories with the network of ethical and aesthetic categories. The student evaluates the ways, tools and methods of logical forms of scientific reasoning as a network of philosophical categories. The student assesses their degree of general knowledge about the world and man's place in it, which is used to construct thought objects, in the formation of concepts, scientific hypotheses, and scientific theories. Competencies: The student will be able to apply and critically define the ontological, epistemological, and ethical assumptions of scientific work. The student is able to apply and identify what is the object of his/her scientific knowledge, what is his/her general way of knowing and, based on this, what are the norms of behavior of members of the scientific community.	
Brief outline of the course: Knowledge from projects (seminar papers) in the 1st semester and presentation of the results of the PhD student's scientific work. Selected problems of sociological research - stages of sociological research; selected techniques of primary data collection; primary data processing - prior to statistical processing. Sources of data for description and analysis of observed phenomena. Sampling; determining the sample size. Descriptive characteristics of nominal, ordinal and cardinal traits.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-Penol	Course name: Penology
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1., 3.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final assessment is carried out in the form of a seminar paper, the topic of which is determined by the student's teacher with a focus on the topic of the student's dissertation and the subsequent oral presentation of the seminar paper.	
Learning objectives: On the basis of the acquired knowledge, the student is able to process and analyse information on prison systems in the past and present at a scientific level and draw relevant conclusions; he/she is able to analyse theoretically and practically the rights and obligations of a person temporarily deprived of personal liberty in relation to constitutionally guaranteed rights and freedoms; is able to evaluate the conditions of detention and imprisonment in the prison system of the Slovak Republic in confrontation with the requirements of the Council of Europe as specified in the European Prison Rules; is able to manage a team dealing with legislative activities in the field of prisons and to speak actively in this area not only at home but also abroad.	
Brief outline of the course: Penology as a scientific discipline. International cooperation in the field of prisons. UN Standard Rules for the Treatment of Prisoners. European Prison Rules. Legislation on detention. Rights, basic duties and prohibitions for the accused. Differentiated detention. Execution of custodial sentences (basic principles of execution of sentences, restrictions on fundamental rights and freedoms, place of execution of sentences). Treatment of convicts (treatment programme, means of treatment). External and internal differentiation. Basic social rights and basic obligations and prohibitions for convicts. Prison and judicial guard corps. Status, organisation, management and scope of the Corps. Post-penitentiary care and reintegration of offenders into society. Legislative rules and legislative practice in the field of prisons.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-TP-VMDV1	Course name: Scientific monograph published in domestic publishing houses I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 15	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Preparation and publication of a scientific monograph by a domestic publishing house. The registration of the subject output in the University Library of the MBU is a prerequisite for completing the course.	
Learning objectives: The student applies the acquired knowledge and skills in specifying the scientific work and research methodology; is able to apply the proposed methodology in the creation of a scientific work; applies the proposed methodology in data processing using selected statistical methods; critically evaluates the achieved results and synthesizes the previously known knowledge on the topic; in the authorship, resp. co-authorship, prepares a scientific work published in printed or electronic form, presenting a comprehensive, integrated, exhaustive, systematic analysis of one topic, scientific problem or part of a scientific field, covering all aspects of the topic.	
Brief outline of the course: A scientific monograph published in domestic publishing houses represents original monothematic works of scientific discovery character, where the author uses, critically reviews and synthesizes the known knowledge on the topic and enriches it with new original findings, which are the result of the author's own scientific work and presents conclusions. Before a scientific monograph is published, it is reviewed by at least two experts, whose names appear in the publications. The scientific monograph shall be at least 3 author sheets in length, have a print run of at least 100 copies, as well as the relevant publisher's details, ISBN or ISSN.	
Recommended literature: literature according to the focus of the scientific monograph	
Language of instruction: slovak language, foreign language of the student's choice	
Notes:student time load: 450 hours

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-TP-VPKC1	Course name: Scientific work in carent journals I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 20	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Elaboration of a scientific thesis that will be accepted for publication in a carentrated scientific journal. The condition for completing the course is the registration of the subject output in the University Library of the MBU.	
Learning objectives: By publishing a scientific thesis in a publication of international quality, the student demonstrates his/her competence to publish research results at an international level; demonstrates the skills acquired in the preparation of a scientific thesis; achieves the competence to communicate with the academic community and to disseminate research results in an effective manner; demonstrates that he/she has become a member of the scientific community.	
Brief outline of the course: Scientific work in peer-reviewed journals means articles or studies that publish original (original) results of the author's or author's team's own work published in carentrated scientific journals with an ISSN or other standard number.	
Recommended literature: professional literature according to the focus of the scientific work	
Language of instruction: slovak language, foreign language of the student's choice	
Notes:student time load: 600 hours

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-TP-SChVMDV1	Course name: Studies in the form of scientific monographs in journals and proceedings published in domestic publishing houses I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 12	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Elaboration and publication of a study in the character of a scientific monograph in a journal or proceedings published by a domestic publishing house. The registration of the subject output in the University Library of the MBU is a prerequisite for completing the course.	
Learning objectives: By publishing a study in the form of a scientific monograph in a journal or proceedings published by a domestic publishing house, the PhD student demonstrates the ability to bring fundamental knowledge or theoretical background on the basis of his/her own research to date; demonstrates acquired skills in the preparation of a study in the form of a scientific monograph; achieves the competence to communicate with the academic community and to disseminate research results; demonstrates that he/she has become a member of a domestic scientific community.	
Brief outline of the course: Studies in the form of scientific monographs in journals and proceedings published in foreign publishing houses represent original monothematic scientific studies, or chapters from original monothematic scientific works. The author uses, critically reviews and synthesizes the known knowledge on the given topic and enriches it with new original findings, which are the result of the author's own scientific work and presents conclusions. Before publication, the study in the form of a scientific monograph is reviewed by at least two experts whose names are mentioned in the publications, and the study in the form of a scientific monograph has a length of at least 3 author sheets, a print run of at least 100 copies, as well as the relevant publishing data, ISBN or ISSN.	
Recommended literature: professional literature according to the focus of the study in the form of a scientific monograph

Level: III.	
Prerequisites:	
Course completion conditions: Elaboration as an author or co-author of a teaching text published in printed or electronic form in Slovak or a foreign language. The registration of the subject output in the University Library of the MBU is a prerequisite for passing the course.	
Learning objectives: The student applies the acquired knowledge and skills acquired during scientific and pedagogical activity; is able to apply the proposed writing methodology in the creation of a teaching text; critically evaluates that the content of the teaching text corresponds to the curriculum and syllabus of the relevant subject; in authorship or co-authorship develops a teaching text published in printed or electronic form, which possesses all the necessary formal and publishing editing according to the applicable standards.	
Brief outline of the course: Textbooks are publications intended for university use, published in print or electronic form, which are usually intended to temporarily replace a missing university textbook. They must have undergone an official publishing process, meet the criteria of a general publication and have all the necessary formal and editorial treatment according to the standards in force. The content of the textbooks must correspond to the curriculum and syllabus of the subject concerned. Various forms are possible: collections of case studies, handbooks for deepening and clarifying cross-curricular content, etc.	
Recommended literature: specialist literature according to the focus of the teaching text	
Language of instruction: slovak language, foreign language according to the focus of the teaching text	
Notes:student time load: 240 hours

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-Vik	Course name: Victimology
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final assessment is carried out in the form of a seminar paper, the topic of which is determined by the student's teacher with a focus on the topic of the student's dissertation and the subsequent oral presentation of the seminar paper.	
Learning objectives: By completing the course, the student will acquire knowledge in the field of victimology. The knowledge about victims of crime thus acquired will enable him/her to approach the solution of the set scientific objectives in a broader context, and not only in a strictly juristic way. The student will gain a comprehensive overview of the legal possibilities for the protection of victims of crime by analysing the Victims of Crime Act in the context of Directive 2012/29/EU establishing minimum standards on the rights, support and protection of victims of crime and Directive 2004/80/EC on the compensation of victims of crime.	
Brief outline of the course: The emergence and development of the victimological perspective. Basic concepts of victimology. Typology of victims. Victims' rights and compensation. Prevention and assistance to victims.
