Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-ObchZ	Course name: Business Obligations
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1., 3.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final assessment is carried out in the form of a seminar paper, the topic of which is determined by the student's teacher with a focus on the topic of the student's dissertation and the subsequent oral presentation of the seminar paper.	
Learning objectives: On the basis of the acquired knowledge, the student expands and develops his/her knowledge of the legal regulation of commercial obligations, including the subsidiary application of civil law norms. On the basis of theoretical knowledge, the student is able to interpret the legal norms of the law of commercial obligations, to apply these norms to solve specific problems in commercial obligation relations, to critically analyse the current legislation, to reflect on the upcoming legislative changes and to formulate his/her own opinions and proposals de lege ferenda. The teaching focuses to a greater extent on the legal regulation of individual contractual types and institutes regulated in the Commercial Code, including obligations arising from international trade.	
Brief outline of the course: Introduction to the issue of commercial obligations. Formation, security and termination of commercial obligations. Commercial liability. Contract of sale. Contract for work. Procurement contracts. Transport contracts. Licensing agreement. Banking contracts. International trade obligations.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-ObčP	Course name: Civil Law
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 1.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final evaluation consists of 2 parts, each with equal weighting, i.e. 50%: 1. the preparation of a seminar paper, the topic of which is determined by the student's teacher with a focus on the student's dissertation topic, and 2. oral examination.	
Learning objectives: The aim of the course is to familiarize doctoral students with current issues of civil law and, from a broader perspective, private law. After completing the course, the student will gain an overview of the legislative changes adopted and their impact on civil law. The content of the course will also include an analysis of the forthcoming changes within the framework of the recodification of private law in the Slovak Republic and related considerations de lege ferenda.	
Brief outline of the course: Students are introduced to current topical issues in civil law to the extent of: 1. Legislative changes adopted in the field of civil law, 2. Analysis of the impact and influence of legislative changes on civil law in the Slovak Republic, 3. Impact of EU law on private law in the Slovak Republic, 4. Legislative initiatives and forthcoming changes in the field of civil (private) law. Within the individual teaching points of the course, students will be guided to formulate reflections and proposals de lege ferenda.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-MetPV	Course name: Legal Science Methodology
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: Final examination in oral or written form.	
Learning objectives: Knowledge and understanding: The student will gain knowledge of the latest trends in legal methodology. Practical skills: The student will apply the latest knowledge regarding views on the concept of law in the methodology of law. The student will analyse and then be able to apply the latest knowledge concerning the interpretation of law in legal practice. This knowledge develops the student's critical thinking skills. Based on this knowledge, the student is able to analyze the impact of legal principles on positive law, the conflict of legal principles with each other, and legal principles and fundamental rights using the so-called judicial tests. As a result of the knowledge and skills acquired, the student is able to analyze the jurisprudence of the courts. Competencies: The student is able to use this knowledge in the development of the dissertation and in the application practice.	
Brief outline of the course: The genesis of the development of the concept of law in legal thinking, the aspect of purpose and meaning in the interpretation of law, principles in legal thinking, the conflict of legal norms and its resolution, analogy in law, legal ethics and its place in reentrant law, legal logic.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-MVPaEVP1	Course name: Methodology of Scientific Knowledge and the Ethics of Scientific Work I.
Type, extent and method of instruction: Form of instruction: Lecture Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 1.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: Final examination in oral or written form.	
Learning objectives: Knowledge and understanding: The student will acquire knowledge of contemporary philosophical-methodological approaches to scientific knowledge. The student is capable of creative analytical thinking in the form of developing his/her own or improving existing attempts to solve problems of scientific research. Practical Skills: The student is able to analyze and identify basic methodological practices in the legal and social sciences. The student is able to critically review given solutions to set research questions and work scientifically. Competencies: Through the acquired knowledge, the student applies an independent creative and critical approach through relevant arguments to the basic problems and theories of legal sciences presented in the dissertation.	
Brief outline of the course: The fragmentation of social knowledge and the status of social sciences and rights. The unity of the social sciences and its foundations. Typology of philosophy of social and scientific knowledge. Characteristics of changes and their results. Methodology of scientific work. Written work for the dissertation examination. Methodology of writing a dissertation; definition of the object and subject of investigation; aim and formulation of hypotheses. Material, determination of the sample, methods of data collection and processing. Methods of scientific research - empirical methods, intuitive and expert methods, theoretical methods. Mathematical and statistical methods of data processing. Ethics of scientific work; technical rules of scientific work (work with source materials,	

testimonial ability of the work), ethical rules of scientific work (honesty, modesty, discussion, polemics, criticism), plagiarism. Formalization of the text.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-MVPaEVP2	Course name: Methodology of Scientific Knowledge and the Ethics of Scientific Work II.
Type, extent and method of instruction: Form of instruction: Lecture Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 2.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: Final examination in oral or written form.	
Learning objectives: Knowledge and understanding: The student is able to identify recent trends and issues in social science methodology. Practical Skills: The student is able to analyze the status and nature of the social sciences. On the basis of the knowledge acquired, the student is able to critically analyse the interconnection of the network of philosophical categories with the network of ethical and aesthetic categories. The student evaluates the ways, tools and methods of logical forms of scientific reasoning as a network of philosophical categories. The student assesses their degree of general knowledge about the world and man's place in it, which is used to construct thought objects, in the formation of concepts, scientific hypotheses, and scientific theories. Competencies: The student will be able to apply and critically define the ontological, epistemological, and ethical assumptions of scientific work. The student is able to apply and identify what is the object of his/her scientific knowledge, what is his/her general way of knowing and, based on this, what are the norms of behavior of members of the scientific community.	
Brief outline of the course: Knowledge from projects (seminar papers) in the 1st semester and presentation of the results of the PhD student's scientific work. Selected problems of sociological research - stages of sociological research; selected techniques of primary data collection; primary data processing - prior to statistical processing. Sources of data for description and analysis of observed phenomena. Sampling; determining the sample size. Descriptive characteristics of nominal, ordinal and cardinal traits.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-OFP-VMDV1	Course name: Scientific monograph published in domestic publishing houses I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 15	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Preparation and publication of a scientific monograph by a domestic publishing house. The registration of the subject output in the University Library of the MBU is a prerequisite for completing the course.	
Learning objectives: The student applies the acquired knowledge and skills in specifying the scientific work and research methodology; is able to apply the proposed methodology in the creation of a scientific work; applies the proposed methodology in data processing using selected statistical methods; critically evaluates the achieved results and synthesizes the previously known knowledge on the topic; in the authorship, resp. co-authorship, prepares a scientific work published in printed or electronic form, presenting a comprehensive, integrated, exhaustive, systematic analysis of one topic, scientific problem or part of a scientific field, covering all aspects of the topic.	
Brief outline of the course: A scientific monograph published in domestic publishing houses represents original monothematic works of scientific discovery character, where the author uses, critically reviews and synthesizes the known knowledge on the topic and enriches it with new original findings, which are the result of the author's own scientific work and presents conclusions. Before a scientific monograph is published, it is reviewed by at least two experts, whose names appear in the publications. The scientific monograph shall be at least 3 author sheets in length, have a print run of at least 100 copies, as well as the relevant publisher's details, ISBN or ISSN.	
Recommended literature: literature according to the focus of the scientific monograph	
Language of instruction: slovak language, foreign language of the student's choice

Course completion conditions: Elaboration and publication of a scientific monograph by a foreign publishing house. The registration of the output in the University Library of the MBU is a prerequisite for completing the course.	
Learning objectives: The student applies the acquired knowledge and skills in specifying the scientific work and research methodology; is able to apply the proposed methodology in the creation of a scientific work; applies the proposed methodology in data processing using selected statistical methods; critically evaluates the achieved results and synthesizes the previously known knowledge on the topic; in the authorship, resp. co-authorship, prepares a scientific work published in printed or electronic form, presenting a comprehensive, integrated, exhaustive, systematic analysis of one topic, scientific problem or part of a scientific field, covering all aspects of the topic.	
Brief outline of the course: A scientific monograph published in a foreign publishing house presents original monothematic works of scientific discovery character, where the author uses, critically reviews and synthesizes the known knowledge on the topic and enriches them with new original findings, which are the result of the author's own scientific work and presents conclusions. Before a scientific monograph is published, it is reviewed by at least two experts, whose names appear in the publications. The scientific monograph shall be at least 3 author sheets in length, have a print run of at least 100 copies, as well as the relevant publisher's details, ISBN or ISSN.	
Recommended literature: literature according to the focus of the scientific monograph	
Language of instruction: slovak language, foreign language of the student's choice	
Notes:student time load: 540 hours

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-OfP-VPvDRC1	Course name: Scientific paper in a domestic peer-reviewed journal I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 6	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Elaboration and publication of a scientific paper in a domestic peer-reviewed journal. The prerequisite for completing the course is the registration of the output in the University Library of the MBU.	
Learning objectives: By publishing a paper in a domestic peer-reviewed scientific journal, the PhD student demonstrates the ability to contribute fundamental knowledge or theoretical background based on his/her own previous research; demonstrates acquired skills in preparing a scientific article; achieves competence to communicate with the academic community and to disseminate research results; demonstrates that he/she has become a member of the domestic scientific community.	
Brief outline of the course: Scientific paper and its structure. Sources of information for a scientific paper. Bibliographical references. Cooperative writing. Scientific and publishing ethics. Selection of a scientific journal. Indexed journal. Predatory journal. Peer review. Open publishing. Evidence of publication activity. Scientometrics.	
Recommended literature: literature according to the focus of the scientific paper	
Language of instruction: slovak language, foreign language of the student's choice

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-PCP	Course name: Securities Law
Type, extent and method of instruction: Form of instruction: Lecture Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13s Method of study: combined	
Number of credits: 5	
Recommended semester/trimester: 1., 3.	
Level: III.	
Prerequisites:	
Course completion conditions: The prerequisite for passing the course is active participation of students in the teaching and passing the final exam. The evaluation is in accordance with the classification scale according to the Study Regulations of the MBU. a) continuous assessment: Continuous evaluation is not performed. b) final assessment: The final assessment is carried out in the form of a seminar paper, the topic of which is determined by the student's teacher with a focus on the topic of the student's dissertation and the subsequent oral presentation of the seminar paper.	
Learning objectives: By completing the course, the student acquires a comprehensive overview of the legal regulation of securities and selected capital market issues in the Slovak Republic on a theoretical level, which is followed by the acquisition of practical skills related to the application of legal regulation in practice (issuance of securities, application of rights with securities, etc.) The above results, in addition to the study of domestic legislation and sources, also assume taking into account international regulations (treaties, conventions) in the field of securities law.	
Brief outline of the course: Basic concepts of securities law. Classification of securities. Issuance of securities. Securities contracts. Promissory note law. Stock law. Regulation of bonds. Commodity securities. Capital market.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-OfP-SChVMDV1	Course name: Studies in the form of scientific monographs in journals and proceedings published in domestic publishing houses I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 12	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Elaboration and publication of a study in the character of a scientific monograph in a journal or proceedings published by a domestic publishing house. The registration of the subject output in the University Library of the MBU is a prerequisite for completing the course.	
Learning objectives: By publishing a study in the form of a scientific monograph in a journal or proceedings published by a domestic publishing house, the PhD student demonstrates the ability to bring fundamental knowledge or theoretical background on the basis of his/her own research to date; demonstrates acquired skills in the preparation of a study in the form of a scientific monograph; achieves the competence to communicate with the academic community and to disseminate research results; demonstrates that he/she has become a member of a domestic scientific community.	
Brief outline of the course: Studies in the form of scientific monographs in journals and proceedings published in foreign publishing houses represent original monothematic scientific studies, or chapters from original monothematic scientific works. The author uses, critically reviews and synthesizes the known knowledge on the given topic and enriches it with new original findings, which are the result of the author's own scientific work and presents conclusions. Before publication, the study in the form of a scientific monograph is reviewed by at least two experts whose names are mentioned in the publications, and the study in the form of a scientific monograph has a length of at least 3 author sheets, a print run of at least 100 copies, as well as the relevant publishing data, ISBN or ISSN.	
Recommended literature: professional literature according to the focus of the study in the form of a scientific monograph

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-OfP-UTAS1	Course name: Teaching text authored/co-authored I.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 8	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Elaboration as an author or co-author of a teaching text published in printed or electronic form in Slovak or a foreign language. The registration of the subject output in the University Library of the MBU is a prerequisite for passing the course.	
Learning objectives: The student applies the acquired knowledge and skills acquired during scientific and pedagogical activity; is able to apply the proposed writing methodology in the creation of a teaching text; critically evaluates that the content of the teaching text corresponds to the curriculum and syllabus of the relevant subject; in authorship or co-authorship develops a teaching text published in printed or electronic form, which possesses all the necessary formal and publishing editing according to the applicable standards.	
Brief outline of the course: Textbooks are publications intended for university use, published in print or electronic form, which are usually intended to temporarily replace a missing university textbook. They must have undergone an official publishing process, meet the criteria of a general publication and have all the necessary formal and editorial treatment according to the standards in force. The content of the textbooks must correspond to the curriculum and syllabus of the subject concerned. Various forms are possible: collections of case studies, handbooks for deepening and clarifying cross-curricular content, etc.	
Recommended literature: specialist literature according to the focus of the teaching text	
Language of instruction: slovak language, foreign language according to the focus of the teaching text

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Law	
Code: 3d-OFP-UTAS3	Course name: Teaching text authored/co-authored III.
Type, extent and method of instruction: Form of instruction: Course type: (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 8	
Recommended semester/trimester:	
Level: III.	
Prerequisites:	
Course completion conditions: Elaboration as an author or co-author of a teaching text published in printed or electronic form in Slovak or a foreign language. The registration of the subject output in the University Library of the MBU is a prerequisite for passing the course.	
Learning objectives: The student applies the acquired knowledge and skills acquired during scientific and pedagogical activity; is able to apply the proposed writing methodology in the creation of a teaching text; critically evaluates that the content of the teaching text corresponds to the curriculum and syllabus of the relevant subject; in authorship or co-authorship develops a teaching text published in printed or electronic form, which possesses all the necessary formal and publishing editing according to the applicable standards.	
Brief outline of the course: Textbooks are publications intended for university use, published in print or electronic form, which are usually intended to temporarily replace a missing university textbook. They must have undergone an official publishing process, meet the criteria of a general publication and have all the necessary formal and editorial treatment according to the standards in force. The content of the textbooks must correspond to the curriculum and syllabus of the subject concerned. Various forms are possible: collections of case studies, handbooks for deepening and clarifying cross-curricular content, etc.	
Recommended literature: specialist literature according to the focus of the teaching text	
Language of instruction: slovak language, foreign language according to the focus of the teaching text	
Notes:student time load: 240 hours
