Learning objectives:
By completing this course, students will:
• Gain knowledge of pluralistic approaches to teaching French
• Gain knowledge of ways to implement these approaches in the classroom
• Enhance their skills in designing pedagogical activities using these approaches

Brief outline of the course:
This course focuses on providing insights into the use of pluralistic approaches in the teaching of French as a foreign language. Pluralistic approaches are didactic approaches that simultaneously incorporate multiple languages and cultures into educational activities. They stand in contrast to traditional approaches, in which only the target language (in this case, French) is used and studied. The main objective is to develop students' multilingual and intercultural competence, i.e., the ability to make connections between the languages they already know and the new language they are learning. The course will cover the four basic pluralistic approaches according to the FREPA/ CARAP reference framework:
• Introduction to languages (students discover and compare different languages, including those not taught at school)
• Intercomprehension between related languages (students use knowledge of one language to understand another language from the same language family)
• Integrated language teaching (knowledge acquired in one language is used to learn another language or to study another subject)
• Intercultural approaches (aimed at fostering understanding and respect for different cultures)
In addition to a theoretical overview, the course will also focus on developing practical activities and exercises using a variety of approaches.
