Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-103	Course name: Anatomy, Traumatology, and First Aid
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 / 13 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. During the last week of the semester, the student demonstrates their ability to perform resuscitation techniques in practice; during the examination period, the student takes a written test. a) continuous assessment: continuous assessment: The ability to perform resuscitation techniques in practice: 20 points (min. 13 p.) b) final assessment: final assessment: Written test: 80 p. (min. 52 p.) The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student: - actively uses correct specialised terminology related to anatomy, traumatology, and basic first aid; - knows the positions, structure, and functions of human body parts – organs, and organs systems (the prerequisite to further develop their theoretical and practical knowledge); - has the theoretical knowledge and practical skills necessary to provide first aid in the case of typical injuries and health disorders, mainly those related to physical education and sports. - understands the importance of anatomy, traumatology, and basic first aid for health and physical development; can apply this knowledge in their own physical regime as well as to prevent civilisation diseases.	
Brief outline of the course: Brief outline of the course: Cell and tissues – basic division and characteristics.	

The anatomy and functions of human organ systems – musculoskeletal system, respiratory system, circulatory system, vascular system, digestive system, nervous system, endocrine system, sensory system, excretory and genitourinary system, skin. The aetiology of injuries and their prevention. Endogenous and exogenous factors, accident prevention. Sports pathology, sports injuries. Symptoms of injuries and body damage. First aid – characteristics, goals, categorisation. Telephone numbers. Life-threatening conditions - cessation of breathing and blood circulation, unconsciousness, shock, bleeding. Cardiopulmonary resuscitation. Epilepsy, acute myocardial infarction, hypoglycaemia, stroke, fractures, wounds, acid/base burns, scalds, heatstroke, overheating, hypothermia, frostbite, car accident. Bandaging and transport techniques.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-112	Course name: Anthropometrics and Sports Anthropology
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 5.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition of subject evaluation is mandatory, active participation of the student in classes. During the semester, the student will perform anthropometric measurements, based on which he will prepare seminar papers. Submission of seminar papers in the required quality in the field of anthropometrics and sports anthropology is a condition for the student's participation in written tests in anthropometrics and sports anthropology. Students can correct the interim evaluation in sports anthropology in the deadlines listed by the teacher within the period for completing the study obligations. Students can correct the interim evaluation of anthropometrics in the deadlines set by the teacher within the period for completing the study obligations.	
a) continuous assessment: continuous assessment: - Written test focused on anthropometrics: 50 p. (min. 32.5 p.) - Written test focused on sports anthropology: 50 p. (min. 32.5 p.)	
b) final assessment: final assessment: Based on the continuous assessment. The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student: - can use their knowledge to measure physical, functional, and motor development of a person; - can diagnose different parameters of physical, functional, and motor development in children, youth, and adults; - can apply the methods of physical anthropology to determine whether a person is growing and developing correctly; - can evaluate the biological criteria related to identifying potential talents and assess the risks; - can design a survey or research focused on physical education and sports;	

- can apply the anthropometric methods and instruments to physical education and sports;
- masters the motor skill measurement methods.

Brief outline of the course:

Brief outline of the course:

Anthropometrics – basic categories, terminology, application in PE practice.

Basic concepts and research methods in anthropometrics.

Human physical attributes and motor skills. Motor skill disorders and laterality in PE and sports.

Testing physical ability and performance to tailor PE and sports.

Sports anthropology – basic concepts and categories. Anthropometry – methodology of measuring human body parameters.

Physical anthropology methods (proportional indexes, somatotype, body composition).

Human ontogenesis (definition of terms: body growth and development, development stages, ontogenesis of motor skills).

Body growth in children.

Regulation of human growth and development (genetics, endocrine factors, environmental factors, etc.). Biological criteria for selecting sporting talents (children and youth): genetic and somatic preconditions, biological age).

Evaluation of physical and motor skill development in children and youth.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-105	Course name: Athletics
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 52 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 4.	
Level: I.	
Prerequisites:	
Course completion conditions: In the course of the semester, the student completes the verification of the level of technique and performance in athletic disciplines, completes a test on the rules. a) continuous assessment: - assessment of technique mastery and performance level achievement in athletic disciplines: 80 points - written test on the rules of athletics and terminology: 20 points b) final assessment: - on the basis of an ongoing assessment The maximum number of points obtained for the interim and final assessment is 100 points, which represents 100%. Students can correct the interim assessment on the dates listed by the teacher within the period for completing the study obligations.	
Learning objectives: Learning outcomes: The student: - navigates the basic athletic disciplines; - masters their techniques; - knows the influence of fitness training on the development of physical abilities and fitness, and can use it in their own training to improve their performance; - knows the basic rules of athletic disciplines; - understands the importance of general and specific warm-up and can use it in teaching as well as in training; - knows the terminology, procedures, and methodology of basic athletic training.	
Brief outline of the course: Brief outline of the course: Training, improving techniques and improving performance in selected athletic disciplines and skills – techniques of movement abilities. Special running and jumping exercises. Low and high start, various types of running, sprint, relay race and hurdle race, long jump, high jump, throwing balls and grenades, shot-put back technique, javelin throwing. Taxonomy and terminology, basic rules of athletics. Organizing and refereeing of athletic races.	

Recommended literature: Recommended literature: ČILLÍK, I. a kol. 2020. Atletika. Banská Bystrica: Slovenský atletický zväz. 247 s. ISBN 978-80-8141-247-9.

Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. During the semester, the student fulfils theoretical and practical requirements within the respective thematic blocks: artistic gymnastics, rhythmic gymnastics, and combat sports. a) continuous assessment: continuous assessment: - Mastering practical skills in artistic gymnastics: 35 p. - Written test focused on artistic gymnastics: 5 p. - Mastering practical skills in rhythmic gymnastics: 20 p. - Written test focused on rhythmic gymnastics: 10 p. - Mastering practical skills in combat sports: 30 p. Students can correct the interim assessment from individual parts of the subject in the deadlines listed by the teacher within the period for completing the study obligations. b) final assessment: final assessment: Based on the continuous assessment. The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student - can use their newly acquired gymnastic and combat sports skills in practice; - can correctly name exercising positions, movements, gymnastic shapes and combat sports movements. The student can: - put their basic skills in gymnastics and combat sports in practice; - knows gymnastics and combat sports, can describe individual disciplines, exercising content, focus, and goal;	

- can assess the technique, aesthetics, and components of selected gymnastic exercises;
- can assess the technique used in the selected combat sport. The student
- can apply the optimal technique to perform gymnastic and combat positions, locomotion, and gymnastic shapes;
- can demonstrate imitation and preparatory exercises, basic gymnastic shapes, and perform individual and group movement combinations (gymnastics and combat sports);
- can assess the quality of their peers' performance in gymnastics and combat sports;
- can identify errors, incorrect posture, decreased range of movement and muscle tone; knows the rights and responsibilities related to gymnastic and combat sport competitions.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-110	Course name: Biomechanics
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 13 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 4.	
Level: I.	
Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. During the semester, the student creates and submits two seminar papers, and takes a test during the examination period. a) continuous assessment: continuous assessment: Seminar papers 1 and 2 in the required quality are submitted during the final week of the semester. b) final assessment: final assessment: - Written test (min. 65%) Grading scale: A (100–94%), B (93–86%), C (86–79%), - 73%, E = 72 - 65%, Fx = 64% and less). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: The student: - can explain the basic mechanical and physical principles; - can explain how physical and biological subsystems cooperate in human movement; - can apply their knowledge and skills in practice to improve their sports performance.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-tre-001	Course name: Creation of Movement Programmes for Disabled Athletes
Type, extent and method of instruction: Form of instruction: Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 3.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition for the evaluation of the course is mandatory, active participation of the student in the class. The student shall during the semester systematically prepares for practical seminar outcomes according to the assigned topics at each class, which he/she works into a portfolio for his/her own needs in terms of sport practice. At the request of the instructor during the semester, the student may be asked to submit (partial part) of the portfolio in terms of quality as well as consolidating the ability to work independently, personal responsibility and the student's approach to the subject. The student's final assessment of the course must master the practical and theoretical requirements set.	
a) continuous assessment: No	
b) final assessment: Final test: 100 points. The course assessment corresponds to the A-FX grading scale: A (100 – 94%), B (93 – 87%), C (86 – 80%), D (79 – 73%), E (72 – 65%). Credits are assigned to the student who acquires a minimum of 65 points out of a possible 100.	
Learning objectives: Student: - knows the basics of neural control of movement, - knows the importance of compensatory exercises in the prevention of injuries and pain in the musculoskeletal system, - knows the issues of education and training of children and pupils with special educational needs, i.e., with mental, physical, visual, hearing disabilities, with impaired communication skills, autism, developmental learning disabilities, learning disabilities behavioral disabilities, children and pupils who are sick and disabled and intellectually gifted, - can apply the basics of compensatory movement programs, - is familiar with medical disorders and the specifics of creating movement programs for individual groups of medically disadvantaged pupils and athletes, - can apply the compensatory effect of physical exercises and knows the appropriate exercises for its achieve, - is familiar with the basic therapies applied in sports rehabilitation.	

Brief outline of the course:

Concept and definition of fatigue, recovery, fitness, special educational needs, i.e., mental, physical, visual, hearing impairment, communication impairment, autism, developmental learning disabilities, behavioral disorders, pupil with illness and disability and intellectually gifted. Means of active regeneration, compensatory movement programs, autogenic training, yoga, compensatory and relaxation exercises. Strengthening, relaxation and stretching exercises. Exercises with balance equipment, demonstrations: DNS, Pillates, TRX, SM system.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-utr-003	Course name: Gymnastics and Combat Sports in Training
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 5.	
Level: I.	
Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. During the semester, the student proves their theoretical knowledge and practical skills in the creation of physical activity plans. They create a training plan focused on developing skills necessary for a variety of sports. This training plan must be based exclusively on the components from gymnastics and combat sports a) continuous assessment: continuous assessment: - presentation of the topic during the seminar: 40 p. - designing specific training programmes: 60 p. b) final assessment: final assessment: Based on the continuous assessment. The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student - uses their knowledge to create physical activity plans based on gymnastics and combat sports in practice - can use gymnastic and combat sport elements to develop physical abilities The student - knows and uses the correct terminology, can describe and use gymnastic and combat sport elements in the creation of physical activity plans. The student - can use optimal gymnastic and combat sport techniques for their physical activity programme; - can perform these elements in practice - can evaluate their peers' performance, identify technical errors, range of motion and muscle tension	

Brief outline of the course:

Brief outline of the course:

Creation of a training plan focused on developing skills necessary for a variety of sports (including age and sex-related specificities)

Gymnastic aids for developing physical abilities: motor-functional preparation, rolls, weight training with gymnastic equipment, stretching, yoga, relaxation exercises.

Combat sport tools for developing physical abilities: fighting exercises and games, correct falling, basic elements (karate, wrestling, judo).

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-107	Course name: Human Physiology and Biochemistry
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 3.	
Level: I.	
Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. During the examination period, the student takes a written test focused on human physiology and biochemistry. a) continuous assessment: continuous assessment: N/A b) final assessment: final assessment: Written test: 100 points (min. (min. 65 p.) The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements	
Learning objectives: Learning outcomes: The student: - actively uses correct specialised terminology related to physiology and biochemistry; - understands biochemical processes relevant for sports performance and adaptation to the training load; - understands how energy is created and transformed, metabolism of energy substrates, and hormonal regulation; - understands functions of different organs and systems during rest; - understands how body works in terms of physiology; - understands how different physiological processes are linked and how the body adapts to load.	
Brief outline of the course: Brief outline of the course: The relationship between the structure and function of substances, which form the essence of the living matter.	

Biological compounds, saccharides, fats, proteins, vitamins, enzymes, nucleic acids. Enzymatic catalysis in biochemical reactions, ways of acquiring energy and its transformation.

Metabolism of energy substrates, hormonal regulation.

Chemical processes in human body and the role of nutrients.

General neurophysiology (neuroglia, resting membrane potential, stimulus, peripheral nerve, synaptic transmission).

Physiology of the central nervous system (functional division: sensory, motor, autonomic nervous system).

Physiology of the cardiovascular system (cardiac physiology, hemodynamics, blood). Physiology of the respiratory system (ventilation, mechanics, regulation of breathing).

Chronophysiology. Thermal regulation.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-utr-004	Course name: Information Technology in PE and Sports
Type, extent and method of instruction: Form of instruction: Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition for the evaluation of the course is the compulsory, active participation of the student in the lessons. The student demonstrates practical and theoretical skills in creating presentations and evaluating data from the field of physical education activities and sports. a) continuous assessment: - Seminar work: 60 points (min 39.b) - Completion of interim tasks 40 points (min. 26. b)	
Learning objectives: Student: - is able to use the Internet to search for information in the field of physical education activities and sports, - knows and has mastered basic work with didactic and information-communication technology (computer, projector, television technology, display surfaces, work with PDAs and mobile phones), - can use basic software tools MS Word, MS Excel, MS Powerpoint, graphic tools, to create presentations in the field of physical education activities and sports, - has basic knowledge of software for communication via the Internet: E-mail, ICQ, IRC, Skype, Moodle, MS Teams, - is able to use and apply ICT technologies in his/her active movement regime as a prevention against civilization diseases.	
Brief outline of the course: The Internet, its characteristics, history, working with the Internet, searching for information via the Internet. Internet browsers and their security. Work with visual, audio, audiovisual equipment and display surfaces. Practical demonstrations with the acquisition, processing and evaluation of data and results from the scientific research field of physical education activities and sports (MS Word, MS Excel, google forms). Creation and possibilities of using communication channels through software platforms E-mail, ICQ, IRC, Skype, Moodle, MS Teams.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-utr-001	Course name: Methodology and Statistics in Final Theses
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: B (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 13 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 5.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition for the evaluation of the course is mandatory, active participation of the student in the class and consultation with the supervisor of the final thesis. During the teaching part of the semester, the student continuously works on the final thesis project, which he/she submits in electronic form by the deadline set by the course instructor. The outcome of the course is the successful completion/assessment of the final thesis project and a written test of the lecture content. The student must master the specified requirements for the final course evaluation. a) continuous assessment: - Written test from the content of lectures: max 40 points, min 26 points - Thesis project assessed by the supervisor: max 60 points, min 39 points. Both parts of the interim assessment can be corrected by the student in case of an insufficient assessment (FX) within the period for completion of study obligations within the deadlines set by the course teacher and the supervisor of the thesis. b) final assessment: - on the basis of a mid-term evaluation. The maximum number of points obtained for the mid-term and final evaluation is 100 points, which is 100 %. This corresponds to the grading scale (A = 100-94 %, B = 93-87 %, C = 86-80 %, D = 79-73 %, E = 72-65 %, FX = 64 % or less). Credit will be awarded to a student who has achieved a minimum of 65 % marks in both interim assessment tasks in order to fulfil the specified requirements and thus meet the requirements for the final assessment of the course.	
Learning objectives: Student: - on the basis of theoretical information and practical skills, he is able to create a comprehensive view of the issue of preparation and implementation of the final thesis, - based on the acquired knowledge, he can search, process and analyze information from a specific issue of the relevant scientific field, the basics of methodology and statistics necessary for the creation of the final thesis.	
Brief outline of the course: Structure of the final thesis. Working with literature and mastering citation standards. Methodological specifics of the given scientific field.	

Content analysis. Basic methods of observation. Interview, questionnaire and survey. Sociometric techniques. Expert judgment and scaling. Testing - motor, knowledge. An experiment. Quantitative methods of evaluation of survey results - research. Statistical analysis of data. Basics of exploratory data analysis. Basic statistical terms. Types of variable scales. Types of selection. Descriptive characteristics of statistical signs. Qualitative methods of processing survey results - research. Basics of logical and factual argumentation of facts. Professional and scientific discussion. Preparation for the defense of the final thesis.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-101	Course name: Movement Games and General Gymnastics
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 39 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 1.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition of subject evaluation is mandatory, active participation of the student in classes. During the teaching part of the semester, the student will present at least 1 movement game, present a warm-up, pass a written test in general gymnastics and demonstrate practical mastery of individual exercise shapes, positions and movements from general gymnastics. Students can correct the interim assessment from general gymnastics in the deadlines listed by the teacher within the period for completing the study obligations. a) continuous assessment: - practical presentation min. 1 movement game: 50 points (min. 33b) - practically show the basic exercise forms, positions and movements: 25 points (min. 16b) - written test in general gymnastics: 25 points (min. 16b) b) final assessment: final assessment: Based on the continuous assessment. The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student: - knows the system of movement games suitable for the preparatory, main, and final parts of the exercise units; - knows the system of movement games involving equipment and aids; - knows the system of movement games focused on different sport games; - can organise and evaluate movement games; - can use the movement games to develop physical abilities and skills; - can correctly name and describe exercising positions, movements and gymnastic shapes; can design and lead a warm-up; - can demonstrate the series of gymnastic exercises individually and in a group;	

- can prove their knowledge of organisation, safety, assistance and rescue; uses the optimal technique to perform basic gymnastic positions and shapes and locomotion;
- can evaluate the technique, aesthetics, and composition (content) of a gymnastic exercise; can identify and evaluate errors in performance, incorrect posture, movement range, muscle tone vs. atony;
- can realistically assess their own level of performance.

Brief outline of the course:

Brief outline of the course:

The importance of games in the education process. Motivation factors in movement games.

Selection, organisation and management of movement games.

Movement games focused on the development of speed, strength, endurance, and coordination skills using a variety of equipment and aids.

Movements focused on volleyball, basketball, football, handball, and untraditional sport games in education.

Posture principles, correct posture, incorrect posture. Basic terminology of physical exercises.

Movement components in general gymnastics.

The structure of a gymnastic unit and organisation – introduction, preparation, main and final parts of the lesson.

Preparation, imitation exercises, learning and improving positions, movements, gymnastic shapes and their series.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-tre-102	Course name: Organising Leisure-Time Physical Activities
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 3.	
Level: I.	
Prerequisites:	
Course completion conditions: During the studies, the student acquires knowledge of the organization and management of a wide range of of leisure-time physical activities, gains information about the possibilities of organizing school and extracurricular sport. Plan, organize and evaluate leisure-time physical activity. a) continuous assessment: - Seminar work (evaluation of leisure physical activity): 0-30 points (min. 20 points) - practical output (planning and organization of leisure physical activity): 0-30 points (min. 20 points) - written test: 0-40 points (min. 25 points) total: 0-100 points (min. 65 points) Students can correct the interim evaluation on the dates announced by the teacher within the period for the completion of study obligations. b) final assessment: On the basis of a continuous assessment. The course assessment corresponds to the A-FX grading scale: A (100 – 94%), B (93 – 87%), C (86 – 80%), D (79 – 73%), E (72 – 65%). Credits are assigned to the student who acquires a minimum of 65 points out of a possible 100.	
Learning objectives: Student: - is familiar with the organization and management of leisure activities for a wide range of people of interested persons; - knows the importance and application of physical activities in leisure time and in contemporary lifestyles youth and adults; - can practically plan and organise different types of leisure-time physical activities; - theoretically knows the control mechanisms for the evaluation of a completed leisure project theoretical and practical aspects of the leisure-time physical activity; - is familiar with the effects and concepts related to the implementation of a leisure-time physical activity; - is familiar with the problems of the contemporary way of life of different groups of people in leisure time and place of leisure-time physical activities in it.	

Brief outline of the course:

Characteristics of physical activity, leisure time and possibilities of its use, meaning and application of physical activities in leisure time and in the contemporary way of life of different groups of people, the impact of environmental and other factors on leisure-time physical activities, basic knowledge and knowledge of the theory of recreational sport, leisure time management, project development in the field of leisure-time physical activities, legislative minimum for the organization of extracurricular and public sports events, concepts of development of physical movement in leisure time, differentiation of approach to differently physically and physically able pupils.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-113	Course name: Physiology of Exercise and Sports and Functional Anatomy
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 5.	
Level: I.	
Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. A written test is taken during the examination period. a) continuous assessment: N/A b) final assessment: final assessment: Written test: 100 points (min. (min. 65 p.) The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student: - understands the role and function of the individual parts of the musculoskeletal system, their control and regulation mechanisms; - knows the structure of a muscle cell, its parts, and function; - understands the basics mechanisms of muscle contraction and the process of creating energy for muscle work; - understands how organ systems work in the process of creating energy in a muscle (cardiovascular, respiratory, hormonal); - understands how muscular activity is controlled by CNS and ANS; - understands the adaptation changes to organ systems during systematic training; - can apply this knowledge to create physical activity programmes focused on increasing performance and improving health;	
Brief outline of the course: Brief outline of the course: Functional anatomy of the musculoskeletal system, primary determinants of individual anatomic structures and the relationship among them, the effect of physical activity.	

Physiology of exercise and sports. The structure and types of muscle tissue, muscle contraction mechanism. Sources of energy for muscle work. The function of the respiratory system during performance (minute ventilation, respiratory volume, adaptation changes during systematic training). The parameters of cardiovascular functions under different types of load (dilation, heart hypertrophy). Changes to blood volume and composition under load and during systematic training. Maximum oxygen consumption, heredity, training and how to affect VO₂ max through training. Physiological mechanisms involved in oxygen transport and utilisation. The physiological concept of aerobic and anaerobic thresholds. The physiological response to systematic physical activity with adaptation changes from the viewpoint of performance and health. Sports chronobiology basics.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-tre-103	Course name: Rules and Judging in Sports Specialisation
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 Method of study: combined	
Number of credits: 2	
Recommended semester/trimester: 4.	
Level: I.	
Prerequisites:	
Course completion conditions: During the semester, the student will participate in the organization and decision-making of a set number of sports competitions. Takes a written exam on the rules of the chosen sports specialization. a) continuous assessment: - written exam on the rules: 40 points - participation in competitions and decision-making (number according to sports specialization): 60 points b) final assessment: - on the basis of an ongoing assessment The maximum number of points obtained for the interim and final assessment is 100 points, which represents 100%. Corresponds to the rating scale (A = 100 - 94%, B = 93 - 87%, C = 86 - 80%, D = 79 - 73%, E = 72 - 65%, Fx = 64 and less). Credits are awarded to a student who has obtained at least 65% of all points from the subject for fulfilling the specified conditions. Students can correct the interim assessment on the dates listed by the teacher within the period for completing the study obligations.	
Learning objectives: Student: - remembers the rules from the issue of sports specialization, - uses knowledge from the rules when deciding competitions, - is able to judge student competitions at the corresponding referee position and competitions of higher categories as a referee according to the directive of the relevant sports association, - applies theoretical knowledge from the rules when deciding recreational or performance sports competitions, taking into account age and other characteristics, - evaluates compliance with the rules and adequately intervenes in the course of the competition, - according to the possibilities and criteria of a specific sport, he or she may obtain the qualification of a referee of the lowest level in a sports specialization.	
Brief outline of the course: Organization and system of sports competitions. Rules of sport. Decision making in sports specialization.	

Recommended literature: Rules of the respective sports specialization.						
Language of instruction: slovak						
Notes:student time load: 60 hours, of which: combined study: 13 hours preparation for the rules exam: 7 hours judging sports competitions: 40 hours

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-104	Course name: Sport Games 1 (Volleyball, Handball, Floorball)
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 52 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition for the evaluation of the course is the compulsory, active participation of the student in the lessons. During the teaching part of the semester, the student undergoes testing of the level of practical skills and performance in the game in the sports games of volleyball, handball and floorball. In the last week, he will take a written test on the rules of these 3 sports games. Students can correct the interim evaluation on the dates announced by the teacher within the period for the completion of study obligations. a) continuous assessment: continuous assessment: - Test of practical skills and game performance: 80 p. (min. 52 p.) - Volleyball: 40 p. (min. 26 p.) - Handball: 20 points (min. 13 p.) - Floorball: 20 points (min. 13 p.) - Written test focused on game rules: 20 points (min. 13 p.) b) final assessment: final assessment: Based on the continuous assessment. The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student: - understands the importance of sport games for the physical development and can integrate it into their regimen; - knows and uses correct terminology (volleyball, handball, and floorball); - knows the rules of volleyball, handball, and floorball; - understands the point of suitable warm-up activities and can apply them in practice;	

- has theoretical knowledge of the social-interactive as well as methodological and organisational forms and their application in training and improvement of individual drills, combinations, and the game system;
- can name and describe player roles in offence and defence (volleyball, handball, and floorball);
- understands drills, combinations, and game systems;
- can demonstrate and apply the techniques of basic individual player actions in a game (match);
- can actively participate in the basic game combinations and the selected game system;
- understands the difference between individual and collective tactics;
- can fill in a simple observation sheet focused on individual and team performance;
- can organise an exercise group, judge the game, organise an event or tournament.

Brief outline of the course:

Brief outline of the course:

The importance and position of sports in human life (school, leisure time). The rules and terminology of volleyball, handball, and floorball.

Warm-up (general, specialised); movement games as a tool to create the contents of training and improvement of game drills.

Social-interactive and methodological-organisational forms in sport games.

Player roles, game actions, drills, game system, game combinations.

Training and improvement – defence and offence drills (methodology).

Training and improvement – defence and offence combinations (methodology). Training and improvement – defence and offence game systems (methodology). Complex individual improvement (match).

Judging, leadership, organisation – tournaments. Basics diagnostics in sports games (motor skill test, check-up exercises).

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-114	Course name: Sport Games 2 (Basketball, Football)
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 52 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 5.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition for the evaluation of the course is the compulsory, active participation of the student in the lessons. During the teaching part of the semester, the student undergoes testing of the level of practical skills and performance in the game in the sports game of basketball, testing of skills and practical presentation of the application of methodological and organizational forms in the training and improvement of HČJ, HK and HS in the sports game of football. In the last week, he will take a written test from the rules of these 2 sports games. Students can correct the interim evaluation on the dates announced by the teacher within the period for the completion of study obligations. a) continuous assessment: continuous assessment: - Test of practical skills and game performance (basketball): 40 p. (min. 26 p.) - Test of practical skills (football): 10 p. (min. 6.5 p.) - Demonstration of methodological and organisational forms in football: 30 p. (min. 19.5 p.) - Written test focused on game rules: 20 points (min. 13 p.) b) final assessment: final assessment: Based on the continuous assessment. The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student: - knows and uses correct terminology (basketball, football); - has theoretical knowledge of the social-interactional as well as methodological and organisational forms and their application in training and improvement of individual drills, combinations, and the game system; - knows the rules of basketball and football;	

- can name and describe player roles in offence and defence in both games;
- understands drills, combinations, and game systems;
- can demonstrate and apply the techniques of basic individual player actions in a game (match);
- can actively participate in the basic game combinations and the selected games systems;
- understands the difference between individual and collective tactics;
- can fill in a simple observation sheet focused on individual and team performance;
- can organise an exercise group, judge the game, organise an event or tournament;
- demonstrates how methodological and organisational forms of training are applied to improve individual drills, combinations, and the game systems.

Brief outline of the course:

Brief outline of the course:

The rules and terminology of basketball and football.

Social-interactional and methodological-organizational forms in sport games.

Player roles, game actions, drills, game system, game combinations.

Training and improvement – defence and offence drills (methodology).

Training and improvement – defence and offence combinations (methodology). Training and improvement – defence and offence game systems (methodology). Complex individual improvement (match).

Judging, leadership, organisation – tournaments. Basics diagnostics in sports games (motor skill test, check-up exercises).

Practical outputs.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-999	Course name: Sport Sciences
Type, extent and method of instruction: Form of instruction: Lecture Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 26 Method of study: combined	
Number of credits: 4	
Recommended semester/trimester: 1.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition of subject evaluation is mandatory, active participation of the student in classes. In the course of the semester, the student submits one term paper for evaluation and at the end passes a written exam on knowledge of the subject of Sports Science. a) continuous assessment: - semester work is focused on social issues of Sports Sciences and professional issues of Sports Sciences: max 50 points, min 32.5 points. b) final assessment: - written exam: max 50 points, min 32.5 points. The maximum number of points obtained for the interim and final assessment is 100 points, which represents 100%. Corresponds to the rating scale (A = 100 - 94%, B = 93 - 87%, C = 86 - 80%, D = 79 - 73%, E = 72 - 65%, FX = 64 and below). Credits will be awarded to a student who has obtained at least 65% of all points in the subject for fulfilling the specified conditions, while obtaining at least the minimum number of points from both the interim and final evaluation.	
Learning objectives: Student: - is able to orientate himself in the system of education in the study field of Sports Science and connections with related fields of study, - is able to orientate himself and has the necessary knowledge of basic terms in Sports Sciences, - is able to correctly use the terminology of individual parts of the subject, - he orients himself in the structure of the scientific field of Sports Sciences from a historical and current/contemporary point of view, - is able to orient himself and has the necessary knowledge in the issue of scientific and research activities in Sports Sciences, - is able to navigate and has the necessary knowledge in current legislation regarding education and sports.	
Brief outline of the course: Introduction to studies, system of education at the university. Specifics of the scientific field Sports Sciences / system of sports sciences; subject, methods, structure/ and related fields.	

The social status of the scientific field of Sports Sciences with its spillover into other social sectors. Basic legislation in sports, financing of sports, professional training for the acquisition of professional competence in sports. Basic terms in Sports Sciences. Organization of physical education and sports in the Slovak Republic. Basic information about the creation of student term papers and final theses. Scientific research methods in Sports Sciences and their application in practice.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-tre-362	Course name: Sport Specialization 2 – Football
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 7	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: The maximum number of points obtained for the interim and final evaluation is 100 points. It corresponds to the grading scale (A = 100 - 94 b, B = 93 - 87 b, C = 86 - 80 b, D = 79 - 73 b, E = 72 - 65 b). Credits will be awarded to a student who has obtained at least 65% of points from both scoring tasks of the interim assessment for fulfilling the specified conditions, has completed the tasks assigned by the course teachers and has complied with the criterion of minimum attendance at classes. a) continuous assessment: UEFA Final Thesis C: 0 - 80 points Written test: 0 - 20 points. Students can correct both tasks of the interim assessment within the deadline set by the teacher within the period for the completion of study obligations. b) final assessment: based on an interim evaluation.	
Learning objectives: Learning outcomes: Student: 1. remembers the knowledge from the subject matter regarding the basic indicators of the training process of youth and adults, 2. use the knowledge in the observation of training units of the youth and adult categories, 3. is able to orient himself in the issues of the training process of youth and adults, 4. evaluates the game performance of a player during observation of a football match using the method of direct observation, 5. is able to use theoretical and practical knowledge in the creation of plans in the training process, 6. can create a comprehensive final thesis "UEFA Grassroots C".	
Brief outline of the course: Adult sports training; Sports training of youth – peculiarities of sports training of children and youth; Basics of planning in football, records of the training process – general and special training indicators; Preparation and management of the team in the match; Biological-medical minimum and basics of first aid in football; Creation of plans – outline of the training unit (TJ) and microcycles (MIC) – workshop; game-oriented training (practice); The use of preparatory games (PH) in the training process (TP) – practice; Analysis of match observation - diagnostics of individual game	

activities (HČJ) in the match (part of the final thesis "UEFA Grassroots C"); Observation analysis of 2 training units (TJ) – youth and adults (part of the final thesis "UEFA Grassroots C"), Compliance check – final thesis "UEFA Grassroots C" = 2 x HP microcycle with 2 training units (1 x for small forms of football = up to U12 and 1 x for big football) and observations 4 training units and 2 matches + written test in accordance with the requirements of the "UEFA Grassroots C license".

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-tre-363	Course name: Sport Specialization 3 – Football
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 7	
Recommended semester/trimester: 3.	
Level: I.	
Prerequisites:	
Course completion conditions: The maximum number of points obtained for the interim and final evaluation is 100 points. It corresponds to the grading scale (A = 100 - 94b, B = 93 - 86b, C = 85 - 79b, D = 78 - 72b, E = 71 - 65b). Credits will be awarded to a student who has earned at least 65% of all points in the course for meeting the specified conditions. Students can correct the interim evaluation on the dates announced by the teacher within the period for the completion of study obligations. a) continuous assessment: 1. Develop a TJ plan focused on training and improving the solution of the selected THSi in the attacking phase of the game (min. 13%. of max. 20%). 2. To lead the part of TJ focused on practicing and perfecting the solution of the selected THSi in the attacking phase of the game (min. 13%. of max. 20%). 3. Develop a TJ plan aimed at improving the selected ÚHK through PH (min. 13% of max. 20%). 4. To implement the management of the TJ part aimed at improving the selected ÚHK through PH (min. 13%. of max. 20%). 5. Individual supervision of 2 matches (small forms and 11:11) with analysis according to the assignment (min. 13% of max. 20%).	
Learning objectives: Learning outcomes: Student: 1. remembers the basic knowledge of the subject matter as a basis for further study of the specialization 2. is able to use the acquired knowledge from the didactics of football when working with a group of players 3. use the knowledge in the analysis of selected indicators of external load of individual players or groups of players and the whole team 3. is able to analyze the basic game combinations and the implemented system of play of the monitored team 4. applies the acquired knowledge in the development of motor skills. 5. use the acquired knowledge in creating the mental and fitness side of the player 6. is able to create an outline and practically implement the methodological output of the selected TJ 7. He knows the basic rules of football	

8. can provide the injured player with the basics of first aid
9. can manage a microgroup of classmates in organizing sample TJ

Brief outline of the course:

Components of sports. training and part of game preparation; Creating a player team, building a team; Offensive and defensive HK - characteristics and use in the game, ŠHS (defense - attack); Game systems, player features – requirements; Nutrition in sports; Psychological preparation in football; MOF in TP; Fitness training in football; Warm-up in football - RCT and RCZ (practice) + FIFA 11+; Goalkeeper's play + N and Z of the goalkeeper's HČ; Basics of first aid (regeneration, physiotherapy, etc.), injury prevention; Presentation of the World Cup from the analysis of the team's play and team management in the match (small forms and 11:11); Methodological output of the TJ management, handover of the TJ outline; TJ observations; Observations of two matches; Test from the rules of football.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-tre-206	Course name: Sport Specialization 6 – Athletics
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 6.	
Level: I.	
Prerequisites:	
Course completion conditions: a) continuous assessment: - presentation of the given topic 0-20 points - active participation in 2 athletic races as organizer, referee 0 - 10 points - active participation in the training process 0 - 20 points b) final assessment: - written and oral exam 0 - 50 points and based on continuous assessment. Students can correct the interim assessment on the dates listed by the teacher within the period for completing the study obligations.	
Learning objectives:	
Brief outline of the course: Planning and subsequent analysis of the content of the training load in the sports specialization. The ability to process theoretical starting points for managing the training process. Determine the goals of the training process and the application of research methods in the management of the training process. Based on the analyses, propose recommendations for sports practice, as well as further optimization of the training process.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-tre-366	Course name: Sport Specialization 6 – Football
Type, extent and method of instruction: Form of instruction: Lecture / Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 13 / 26 Method of study: combined	
Number of credits: 6	
Recommended semester/trimester: 6.	
Level: I.	
Prerequisites:	
Course completion conditions: Conditions for completing the course: The maximum number of points obtained for the interim and final evaluation is 100 points. It corresponds to the grading scale (A = 100 - 94b, B = 93 - 86b, C = 85 - 79b, D = 78 - 72b, E = 71 - 65b). Credits will be awarded to a student who has earned at least 65% of all points in the course for meeting the specified conditions. Students can correct the interim evaluation on the dates announced by the teacher within the period for the completion of study obligations. a) continuous assessment: Methodological output from the TJ part: 0-30 points Test from T and D FU: 0-40 points Preliminary BcP: 0-30 points b) final assessment: based on an interim evaluation	
Learning objectives: Learning outcomes: Student: 1. remembers the knowledge from the subject matter as the basis for completing the study of the specialization. 2. acquires the knowledge necessary for the creation of the final thesis of the Bachelor's study 3. Uses knowledge to create outlines of training units 4. applies knowledge of theory and practical experience in methodological output 5. can independently present the content of his/her BcP 6. is able to use the acquired knowledge in diagnosing his/her knowledge in the form of a written test.	
Brief outline of the course: Scientific research work in football; Typical game situations (workshop); Tactical preparation in football; Methodological outputs of students - practical implementation of TJ; Predobhajoba BcP; Exam written test in theory and didactics + presentation of the game of your own team; Homework: consult with the BcP supervisor (min 4 times per semester).

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-utr-250	Course name: Student scientific activity 1
Type, extent and method of instruction: Form of instruction: Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: A condition of the course assessment is the active participation of the student in the SSCC. During the semester, the student continuously works on his/her research project or on the creation of a movement composition. The outcome of the course is the submission and handing in of the project of the scientific thesis or the idea sheet of the movement composition and the active performance at the all-faculty SVUK on the specified date in the summer semester. The student must master the specified requirements for the final course grade. b) final assessment: - on the basis of active participation in the faculty-wide SACS (graduated).	
Learning objectives: Student: Theoretical section - remembers and masters the knowledge of the issues of preparation and implementation of scientific work, - can apply the knowledge in specific scientific work. - is able to orientate himself/herself in the problems of different types of professional and scientific work, - is able to understand the interrelationships of knowledge from individual disciplines of higher education, - is able to apply the knowledge acquired in the subjects to specific procedures in his/her own scientific work. - can correctly use methods, interpret results and formulate conclusions, - can create a specific scientific work in sport, which can be the basis for his/her final thesis. - can analyse a solved problem into logically and systematically separated and interconnected structural parts of a scientific thesis. - is able to continue his/her education in the subject and can be independent and autonomous. Movement tracks - Can perform an overall harmonisation of movement and music - knows how to apply appropriate content means in relation to the subject and the maturity of the practitioners, technical demonstration - can interpret the musical subject in rhythmic, tempo and dynamic structure, uniformity of performance, interplay in plan and space.	

- can use variety, gradations, logical sequence of exercises, development and variations of supporting movement motifs,
- knows how to incorporate appropriate elements with the application of compositional articulation, application of contrast and variety of variations of movement motifs
- can create and perform a complete movement composition with an original theme.

Brief outline of the course:

Theoretical section

- Preparation and implementation of scientific work.
- Timetable of thesis development.
- The peculiarities of scientific work in sport.
- Work with sources, list of bibliographic references - Individual parts of the scientific work.
- Methods of data acquisition.
- Methods of evaluation.
- Interpretation of results, formulation of conclusions, etc.
- Ethical issues related to scientific work.
- Communication skills in presentation.
- Shortcomings in conducting research and writing scientific papers.

Movement tracks

- Preparation of the theme of a movement composition.
- selection of a musical theme
- choreography
- technical mastery of individual movement elements and their variations
- application of spatial changes
- use of appropriate expressive elements and means

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-102	Course name: Summer Seasonal Activities
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 39 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. The student acquires the following knowledge and skills: practical specialised and technical skills related to outdoor activities and camping; organisation of a hiking-orienteeing run; outdoor games and experiential teaching; practical mastering, planning, preparation, organisation, and implementation of specific hiking routes; successful completion of an orienteeing run. a) continuous assessment: continuous assessment: - seminar paper: 20 p. - practical mastering specialised and technical skills related to outdoor activities and camping, organisation of hiking and orienteeing run, outdoor games, and experiential teaching; 20 p. - practical mastering, planning, preparation, organisation, and implementation of specific hiking routes; 40 p. - Successful completion of an orienteeing run: 20 p. b) final assessment: final assessment: Based on the continuous assessment. The maximum number of points consisting of continuous and final assessment is 100 (=100%). Grading scale: A (100–94%), B (93–87%), C (86–80%), D (79–73%), E (72–65%), Fx (less than 64%). Credits are assigned to the student who collects the minimum of 65 points out of the possible 100 for completing the given requirements.	
Learning objectives: Learning outcomes: The student - navigates the subject matter and has the necessary knowledge of summer seasonal activities including the course of life and health protection, - can apply their knowledge and hiking skills in practice - can plan and organise a short-term hiking activity in practice, - uses their knowledge and skills from training in practice.	

- can design, facilitate, and organise simple competitive and other summer physical activities.

Brief outline of the course:

Brief outline of the course:

The history of hiking and outdoor activities.

Basic practical specialised and technical skills related to outdoor activities and camping;
zabezpečenie túr hviezdového charakteru.

Cultural and other excursions allowing to link the knowledge from different academic subjects at schools.

Acquisition of practical knowledge and outdoor sport related skills focused mainly on orienteering.

Practical outdoor games and exercises – experiential learning and teaching; outdoor animation; navigation; mountain dangers; hiking equipment; planning and organisation of outdoor activities and camping; health benefits of hiking; navigation using a map; ICT and new trends in outdoor activities.

Environmental protection vs. hiking and camping, basic environmental education.

The course of life and health protection – outdoor activities and camping in school education, characteristics of the activities and skills addressed within individual thematic units.

The system of educating sport experts and outdoor activities.

Getting acquainted with the valid legislation addressing outdoor sports and educational activities.

Prerequisites:	
Course completion conditions: Course completion conditions: Active attendance is required. The student demonstrates the correct techniques of the selected swimming styles, starts, and turns as well as swimming performance (tetrathlon). a) continuous assessment: continuous assessment: - Swimming styles, starts, and turns – assessment: 45 p. - Performance-focused swimming tetrathlon: 45 p. - swimming underwater: 10 p b) final assessment: - on the basis of an interim evaluation Students can correct their interim assessment at the dates announced by the teacher within the period for completion of the study obligations. The maximum number of points obtained for the mid-term and final assessment is 100 points, which is 100%. This corresponds to the grading scale (A = 100-94%, B = 93-87%, C = 86-80%, D = 79-73%, E = 72-65%, Fx = 64% or less). Credit will be awarded to a student who has earned at least 65% of the total points in the course for meeting the specified requirements.	
Learning objectives: Learning outcomes: The student: - knows the swimming terminology, can describe basic turns and starts in different swimming styles; - can use swimming aids correctly (goggles, floating aids); - can perform basic swimming movements pertaining to the selected swimming styles correctly; - can swim correctly in terms of technique including starts and turns; - proceeds correctly in individual learning and improvement of swimming skills and styles; - can evaluate technical errors in swimming techniques upon observation.	
Brief outline of the course: Brief outline of the course:	

Swimming skills (floating, gliding, breathing, navigation, underwater swimming, diving).
 Breaststroke – training legs, arms, breathing, synchronisation, starts, turns.
 Crawl – training legs, arms, breathing, synchronisation, starts, turns. Backstroke – training legs, arms, breathing, synchronisation, starts, turns.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-utr-253	Course name: Volunteering in sports 1
Type, extent and method of instruction: Form of instruction: Course type: C (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 2.	
Level: I.	
Prerequisites:	
Course completion conditions: 1. Active volunteering for a total of 40 hours for: (a) an international or domestic sporting event organised by a national sports federation or other sports organisation, (b) a faculty or national round of the SVA; or (c) co-organising sporting events for students and staff of UMB 2. Preparation of a final report on the volunteering activity, which is also a certificate of completion. The student's final report will be certified by the organisation for which the volunteering activity was carried out. The confirmation shall include the name of the organisation, the student's name, surname and date of birth, the name of the sporting event, the date and the total time in hours of the volunteering activity. The student shall briefly describe the content of the volunteering activity and the skills acquired during the volunteering. b) final assessment: Final grade based on completion of course requirements and student completion of a final report - (Pass). The student may also acquire a total of 40 hours through a combination of volunteering at several events in which he/she has actively participated.	
Learning objectives: Student: - is able to use terminology correctly in the chosen sport, - is able to correctly name and describe the content of the chosen sport, - knows the rules in the chosen sport, - is flexible and able to fulfil the tasks of the organising committee	
Brief outline of the course: Volunteering at an international sporting event.

Course Description

University: Matej Bel University in Banská Bystrica	
Faculty: Faculty of Sports, Science and Health	
Code: 1e-ozvstv-109	Course name: Winter Seasonal Activities
Type, extent and method of instruction: Form of instruction: Seminar Course type: A (A - Compulsory courses, B - Compulsory elective courses, C - Elective courses) Recommended number of periods: 65 Method of study: combined	
Number of credits: 3	
Recommended semester/trimester: 3.	
Level: I.	
Prerequisites:	
Course completion conditions: The condition of subject evaluation is mandatory, active 100% participation of the student in classes. The student will acquire practical skills in cross-country and downhill skiing, snowboarding and skating. Students can correct the interim assessment on the dates listed by the teacher within the period for completing the study obligations. a) continuous assessment: Practical presentation of: Alpine skiing - 30 points (min.20 points), Cross country skiing - 25 points (min.16 points), Snowboarding - 25 points (min. 16 points), Skating - 20b (min. 13 points), b) final assessment: On the basis of a continuous assessment. The course assessment corresponds to the A-FX grading scale: A (100 – 94%), B (93 – 87%), C (86 – 80%), D (79 – 73%), E (72 – 65%). Credits are assigned to the student who acquires a minimum of 65 points out of a possible 100.	
Learning objectives: The student: - knows how to apply his/her knowledge in the selection of suitable ski equipment, - has mastered the basic rules of safety of staying and moving on the slopes and on the ice surface, - knows and is able to use correctly the technical terminology used in winter sports (skiing, snowboarding and skating, - knows the practical skills of cross-country and downhill skiing, snowboarding and skating, - can analyze terrain conditions and adapt their riding to them, - understands the impact and importance of the natural environment and the implementation of winter sports for human health and physical development.	
Brief outline of the course: Student: Theoretical basics of downhill and cross-country skiing, snowboarding, and skating.	

Selection of skiing, snowboarding and skating equipment. Maintenance and waxing of skis and snowboards. Games in the snow. Principles of safety on the slopes and on the ice. Principles safety of staying and moving on the slopes - white code. Practice of basic and advanced downhill skiing techniques (balance on skis, downhill, curves - in two-sided inversion, from two-sided inversion, from inversion top and bottom ski, downhill curves, riding in rough terrain, basics of carving). Practice of basic snowboard training techniques (sliding down the chute, sliding diagonally slope, slant slope riding, sliding a half-arch to the slope (fan, girlangs), snowboard curves (frontside and backside), snowboard control, smooth and safe riding on downhill, riding on the lift). Practice of technique in classic and skate style cross-country skiing (alternating two-step running, running with a push-off, single and single-step, double-sided skating single- and double-step with alternating arm work). Practice of basic skating technique (walking on skates, forward skating, skating backwards, stopping, short arcs, forward skating, skate control, smooth and safe skating on ice).
